Prime Ministers in Central and Eastern Europe Florian Grotz, Jan Berz, Corinna Kroeber, Marko Kukec, 2025-01-12 Prime Ministers PMs are the most influential powerful and visible politicians in parliamentary democracies Their prominent role has been increasing in Western democracies due to the presidentialization of politics But is this also true for new democracies such as those in post communist Central and Eastern Europe CEE As politics in CEE has been characterized by high personalization weak voter party linkages and strong media influence of political leaders prime ministerial performance may be even more important for the functioning of parliamentary democracy in those countries At the same time conventional wisdom suggests that prime ministers in CEE perform weakly because they lack political experience and operate in an extraordinarily difficult context but this assumption has not been systematically examined To close this research gap this book presents a new conceptual approach to measuring prime ministerial performance and offers a novel dataset of 131 cabinets in eleven CEE countries between 1990 and 2018 The comparative analyses of this data reveal that the political experience of post communist prime ministers varies considerably they range from politically inexperienced outsiders to insiders with long standing careers in parliament government and party leadership At the same time multivariate analyses of the quantitative data and qualitative cases demonstrate that variations in the careers contexts and performance of prime ministers are systematically connected In this way the book not only qualifies conventional assumptions about prime ministers in CEE but also substantiates the theoretical relationship between their careers contexts and performance Prime Ministers in Central and Eastern Europe thus contributes to an enhanced

understanding of the functioning of post communist democracies and provides new insights for scholarly work engaging with political leadership Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterized by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Nicole Bolleyer Chair of Comparative Political Science Geschwister Scholl Institut LMU Munich and Jonathan Slapin Professor of Political Institutions and European Politics Department of Political Science University of Zurich

Nepal'S Enduring Poverty Sukhdev Shah,2015-08-18 Theory of economic growth has made remarkable progress over the past three decades that has helped give us a better understanding of factors that induce or inhibit growth In practice though a majority of countries have failed to increase growth and improve living conditions The elixir that has been absent from traditional growth theories is the role of an enabling environment that is needed to induce and support growth This book a case study of Nepals poverty presents the view that non economic factors play an outsized role in determining the productive use of economic resources which is critical to spur growth to a much greater extent than the level of resources a country commands The theme developed in this book is that a countrys institutional weaknesses create a hostile environment for economic growth to occur and be sustained Institutional handicaps exercise powerful constraints on the efficiency of use of resources and creation of wealth This happens because institutions are rooted in a countrys history its culture emotions and even in national psychology
