#FeesMustFall and Youth Mobilisation in South Africa Musawenkosi Ndlovu, 2017-07-14 This book examines the historical FeesMustFall FMF university student protests that took place in South Africa and shows how the enduring historical construction representation and conceptualisation of South African youth as typically radical and political contributed to the misinterpretation of FMF protests and led to a discourse on an African National Congress toppling revolution Arguing that the student protests were not the revolutionary movement they have been represented as Ndlovu demonstrates that ideological divisions amongst the protestors the declining economy and reduced youth participation in the political public sphere cannot lead to a new revolution in South African politics This book will be of interest to students and scholars interested in South African politics higher education democracy and protest movements **Rethinking Climate Change, Conflict and Security** Jan Selby, Clemens Hoffmann, 2017-10-02 Is global climate change likely to become a significant source of violent conflict and should it therefore be seen as a national security challenge Most Northern governments militaries think tanks and NGOs believe so as do many academic researchers on the grounds that increased temperatures changing precipitation patterns and rising sea levels will worsen existing social stresses especially within poor societies and marginal communities across Africa and Asia This book argues otherwise The first collection of its kind it brings together leading scholars of Anthropology Geography Development Studies and International Relations to provide a series of critical analyses of mainstream thinking on the climate security nexus It shows how policy discourse on climate conflict consistently misrepresents the causes of violence especially by obscuring its core political dimensions It demonstrates that quantitative research provides a flawed basis for understanding climate conflict linkages It argues that climate security discourse is in hoc with a range of questionable military authoritarian and developmental agendas And it reveals that the greening of global capitalism is already having violent consequences across the global South Climate change the book argues does indeed have serious conflict and security implications but these are quite different from how they are usually imagined This book was published as a special issue of Geopolitics *Citizen and Pariah* Vanya Gastrow, 2022-03-01 *Citizen and Pariah* explores the fragility of law pluralism and democracy in South Africa by investigating Somali informal shopkeepers experiences of crime justice and regulation in the country Through a narrative account of their local experiences the book sheds light on the legal and political predicaments they face *The Oxford Guide to the Bantu Languages* Lutz Marten, Ellen Hurst-Harosh, Nancy C.
