introduction of computer tools into the creation of art to understand the issues and the fuss to appreciate the people involved and the work they produce to know the promise of the new media as well as the risks Following his own winding path Faure Walker tells of learning to paint with the computer of misunderstandings across the art and science divide of software limitations of conversations between the mainstream and digital art worlds of emerging genres of digital painting of the medieval digital of a different role for drawing As a painter and computer enthusiast the author recognizes the marvels of digital paint as well as anyone But he also challenges the assumption that digital somehow means different The questions he raises matter to artists of every background style and disposition and the answers should reward anyone seeking insight into contemporary art
