

Getting Acquainted

Congratulations upon your selection of this CASIO watch. To get the most out of your purchase, be sure to carefully read this manual and keep it on hand for later reference when necessary.

- Expose the watch to bright light to charge its battery before using it. You can use this watch even as its battery is being charged by exposure to bright light.
- Be sure to read "Battery" of this manual for important information you need to know when exposing the watch to bright light.

If the display of the watch is blank...

- If the Power Saving on (PS) indicator flashes on the display, it means that the display is blank because the watch's Power Saving function has turned off the display to conserve power. Power Saving automatically turns off the display and puts the watch into a sleep state whenever your watch is left for a certain period when it is dark.
- The initial factory default setting is Power Saving on.
- The watch recovers from the sleep state if you swing it to a west-12 area or if you press any button, or if you angle the watch towards your face for reading.
- It can take up to five seconds for the display to turn on.
- See "Power Saving function" for more information.

- Whenever you change the time setting for any city in the World Time Mode, the settings of all other cities are changed accordingly.
- The UTC differential value indicates the number of hours difference in time between the currently selected time zone and UTC.
