The Sociology of Education Jeanne Ballantine,Jenny Stuber,Judson Everitt,2021-07-29 The ninth edition of The
 Sociology of Education examines the field in rare breadth by incorporating a diverse range of theoretical approaches and a
 distinct sociological lens in its overview of education and schooling Education is changing rapidly just as the social forces
 outside of schools are and to present the material in a meaningful way the authors of this book provide a unifying framework
 an open systems approach to illustrate how the issues and structures we find in education are all interconnected Separate
 chapters are devoted to how schools help shape who has access to educational opportunities and who does not issues of race
 class and gender the organization of schools and the roles that make up educational settings and more Throughout the book
 readers will have an opportunity to engage with theories and issues that are discussed and to apply their newly obtained
 understanding in response to emerging and persistent problems in the educational system The new edition continues to be a
 critical point of reference for students interested in exploring the social context of education and the role education has in
 shaping our society It is perfect for sociology of education and social foundations of education courses at the undergraduate
 or early graduate level **An Ed-Tech Tragedy?** Mark West,2025-10-10 The COVID 19 pandemic pushed education from
 schools to educational technologies at a pace and scale with no historical precedent For hundreds of millions of students
 formal learning became fully dependent on technology whether internet connected digital devices televisions or radios An Ed

Tech Tragedy examines the numerous adverse and unintended consequences of the shift to ed tech. It documents how technology first solutions left a global majority of learners behind and details the many ways education was diminished even when technology was available and worked as intended. Using tragedy as a metaphor and borrowing the organization of a three act theatrical play, the book shows how technology first modes of learning introduced novel health and safety risks, handed significant control of public education to for profit companies, expanded invasive digital surveillance, and carried detrimental environmental repercussions in addition to adversely impacting educational access, equity, quality, and outcomes in most contexts. Dedicated sections consider alternative and less technology reliant educational responses to COVID 19 disruptions that had the potential to be more inclusive and equitable. The analysis further explains how pandemic models of learning are rippling beyond school closures and influencing the future of education. Holistically, the work invites readers to reconsider a turbulent chapter in education history and reexamine the purposes and roles of technology in education. **An Ed-Tech Tragedy?** UNESCO, West, Mark, 2023-09-08 *Education 2.0* Linda Herrera, 2025-11-17 Education 2.0 offers a compelling portrait of Egypt's bold attempt to overhaul its public education system amid sweeping political and technological transformation. Drawing on extensive oral history interviews, this book traces the launch and rollout of the New Education System initiated by the Ministry of Education in 2018, designed to modernize curriculum, pedagogy, and assessment in the digital age and change the culture of learning. The volume moves fluidly from macro level state planning to the lived experiences of teachers and students, exploring the promises and pitfalls of top down reform. Conducted partly during the COVID 19 pandemic, the research captures Egypt's first large scale experiment with hybrid and distance learning. Interviews with key actors from policymakers and tech developers to students and educators reveal competing visions, unintended consequences, and the challenges of culturally transforming education systems in a middle income country where private tutoring is rife, the sector is chronically under resourced, and politics overshadows policy. This book is essential reading for scholars, practitioners, and policymakers interested in education reform, digital transformation, and the role of the state in shaping learning futures in the Global South. It is also an excellent case study for courses in Middle East studies and comparative and international education. *Teacher (High School General Education)* National Learning Corporation, 2013 The Teacher High School General Education Passbook R prepares you for your test by allowing you to take practice exams in the subjects you need to study.
