*Cooperative Learning and the Collaborative School* Ronald S. Brandt, 1991 Cooperation in the classroom counteracts well established routines and values that nearly all adults and many educators take for granted Education remains a fiercely competitive enterprise and

individualistic notions of professionalism predominate. Despite the continued importance of independence, initiative and personal achievement, today's schools are experimenting with consideration, sharing, collegiality and commitment to group goals. This volume contains readings from recent editions of *Educational Leadership* on cooperative learning and collaborative schools, beginning with Robert Slavin's introduction and Ronald Brandt's insistence that cooperation is not un-American. The articles in the second section discuss various cooperative learning models including Team Assisted Individuation, Cooperative Integrated Reading and Composition and Group Investigation. The third section is devoted to implementation of cooperative learning and the fourth section highlights the idea of schools as caring communities developed through group work. The sixth section provides ideas on how to get started and the seventh section summarizes controversies among various researchers. The final section presents articles on the collaborative school focusing on developing teacher collegiality, cooperative professional development and school improvement efforts. The volume ends with an extensive annotated bibliography divided into nine parts.

**MLH      Writing Effective Lesson Plans** Peter Serdyukov, Mark Ryan, 2008  
 Developed by two educators with experience in both elementary and secondary classrooms, *Writing Effective Lesson Plans* details a unique, a step-by-step procedure designed to streamline the process of lesson planning and make teaching smoother and more efficient. Coined the Five Star Lesson Plan by the authors, this model consists of five classic components: lesson description, goals and objectives, materials and tools, procedures and reflective assessment and evaluation. This workbook guides beginning and experienced teachers through each step to create lesson plans that best meet the needs of every student. It also explores the inherent challenges to effective lesson planning such as time efficiency, knowledge construction, skill development involving the students' families and implementing your plan. With its mix of concise theory and hands-on activities, this book is a one-stop resource encouraging a deep and thoughtful approach to a skill that is often not sufficiently developed in teacher preparation programs.

**Content-based Second Language Teaching and Learning** Marjorie Hall Haley, Theresa Y. Austin, 2004

Unique in its kind, this highly practical text offers more methodological approaches to teaching in ESL settings than any other book on the market, making it a perfect match for undergraduate pre-service teachers who are learning how to teach ESL students in their classrooms. Novice teachers will have the opportunity to interact with the text, reflect and consult with colleagues, partners and classmates by being able to write in the text, revisit those responses and view video clips on the Companion Website.
