Occupational Safety and Hygiene V Pedro M. Arezes, João Santos Baptista, Monica P. Barroso, Paula Carneiro, Patrício Cordeiro, Nelson Costa, Rui B. Melo, A. Sergio Miguel, Gonçalo Perestrelo, 2017-03-27 Occupational Safety and Hygiene V contains selected contributions from the International Symposium on Occupational Safety and Hygiene SHO 2017 10 11 April 2017 Guimarães Portugal The contributions focus on a wide range of topics including occupational safety risk assessment safety management ergonomics management systems environmental ergonomics physical environments construction safety and human factors Occupational Safety and Hygiene V is mainly based on research carried out at universities and other research institutions but also includes practical studies developed by OHS Practitioners within companies Accordingly this book will be a helpful text to get acquainted with the state of the art in research in these domains as well as with some practical tools and approaches that are currently used by OHS professionals worldwide **Vernacular and Earthen**

Architecture: Conservation and Sustainability Camilla Mileto, Fernando Vegas López-Manzanares, Lidia García-Soriano, Valentina Cristini, 2017-09-01 Vernacular architecture in general and earthen architecture in particular with their rich variety of forms worldwide are custodians of the material culture and identity of the peoples who built them In addition they are widely recognized as ancestral examples of sustainability in all their variants and interpretations and the architecture of the present ought to learn from these when designing the sustainable architecture of the future The conservation of these architectures seemingly simple yet full of wisdom is to be undertaken now given their intrinsic value and their status as genuine examples of sustainability to be learnt from and interpreted in contemporary architecture Vernacular and earthen architecture Conservation and Sustainability will be a valuable source of information for academics and professionals in the fields of Environmental Science Civil Engineering Construction and Building Engineering and Architecture Climate Resilient, Green and Low Carbon Built Environment Ashok Kumar Jain, 2023-04-26 This book constitutes state of the art research covering a wide range of topics including climate change and carbon emissions air quality and pollution control urbanism land and circular economy sustainable transport energy water biodiversity and greenery environmental services housing and construction with respect to the built environment The concepts of sustainability in built environment conclude with reimagining the city The content includes pedagogical features such as examples simple flowing language and over 100 figures The book aims to motivate architects engineers consultants builders and planners to respond to the challenges of sustainability in the built environment **Towards Green Campus**

Operations Walter Leal Filho, Fernanda Frankenberger, Patricia Iglecias, Roberta Consentino Kronka Mülfarth, 2018-05-14 Matters related to sustainable development albeit global in nature are best handled at the local level This line of thinking is particularly true to the higher education context where the design and implementation of sustainability initiatives on campuses can demonstrate how a given university translates the principles of sustainable development into practice at the

institutional level Yet there is a paucity of specific events where a dialogue among sustainability academics and practitioners concerned with a research projects b teaching and c planning and infra structure leading to campus greening takes place so as to allow a transdisciplinary and cross sectoral exchange of ideas and experiences on the issues matters and problems at hand It is against this background that this book has been prepared It is one of the outcomes of the First Symposium on Sustainability in University Campuses SSUC 2017 organised by the University of S o Paulo in Brazil Manchester Metropolitan University UK the Research and Transfer Centre Applications of Life Sciences of the Hamburg University of Applied Sciences Germany and the Inter University Sustainable Development Research Programme IUSDRP This book showcases examples of campus based research and teaching projects regenerative campus design low carbon and zero carbon buildings waste prevention and resilient transport among others It also demonstrates the role of campuses as platforms for transformative social learning and research and explores the means via which university campuses can be made more sustainable The aims of this publication are as follows i to provide universities with an opportunity to obtain information on campus greening and sustainable campus development initiatives from round the world ii to document and promote information ideas and experiences acquired in the execution of research teaching and projects on campus greening and design especially successful initiatives and good practice iii to introduce methodological approaches and projects which aim to integrate the topic of sustainable development in campus design and operations This book entails contributions from researchers and practitioners in the field of campus greening and sustainable development in the widest sense from business and economics to arts administration and environment

Advanced Studies in Efficient Environmental Design and City Planning Ferdinando Trapani,Nabil Mohareb,Federica Rosso,Denia Kolokotsa,Sreetheran Maruthaveeran,Mahmoud Ghoneem,2021-09-24 This book explains how learning from past mistakes in urban design can help to enhance sustainable cities and how the principles of Green Urbanism can yield more resilient urban settlements Environmental design is a fundamental principle in shaping cities However environmental challenges like increased resource consumption water degradation and waste related issues are among the greatest problems now facing humanity which is why these issues need to be considered with regard to smart cities either for the development of new urban centers or for the transformation of existing cities The book not only discusses the importance of integrating sustainability principles in the urban design process but also demonstrates their application to the development of sustainable cities As such the book offers essential information and a source of inspiration for all those who want to build more sustainable cities
