Epigenetic Regulation of Autophagy in Inflammatory Diseases Kai Wang,Chao Yang,Haiyong Wang,Bailong Tao,Shicheng Guo,2024-03-13 Epigenetics refers to changes in the expression of heritable genes or cellular phenotypes caused by regulating DNA methylation histone modification chromatin remodeling and noncoding RNA expression without altering the DNA sequence It plays a critical role in the regulation of many physiological and pathological processes such as inflammation immunity and tumor In particular many epigenetic modifiers have been found to affect innate cell development infection and inflammatory responses by regulating gene specific expression Epigenetic abnormalities often result in changes in gene expression and its function which in turn promote the process of inflammation and even tumorigenesis Autophagy is a highly conserved subcellular degradation process by which some damaged organelles misfolded proteins nucleic acids and pathogenic microorganisms are digested to maintain homeostasis Autophagy dysregulation has been implicated in multiple diseases including inflammation tumors and neurodegenerative diseases It is not only a cytoplasmic event but also involved in the regulation of nuclear components including histone modifications microRNA and transcription factors Methyltransferase mediated histone modifications H3K9me2 H3R17me2 and H3K27me3 miRNAs and DNA methylation catalyzed by DNA methyltransferase are the key nuclear factors involved in the regulation of autophagy In addition some autophagy related genes Atgs promote or inhibit the autophagic process through epigenetic modifications such as histone modifications and DNA methylation affecting the occurrence and development of inflammatory diseases Studying the role of epigenetic regulation of autophagy in inflammatory diseases may help identify novel drug targets and develop potential diagnostic and therapeutic approaches Although the biological and clinical significance of epigenetic modification of autophagy has attracted more and more attention from researchers this regulation is very complex and its role and mechanism in inflammatory diseases are still unclear Defect and Diffusion Forum Vol. 417 Agus Purwanto,Hendri Widiyandari,Anif Jamaluddin,Steven Y.
