Tools for Strengths-Based Assessment

and Evaluation Catherine Simmons, 2012-11-08 Traditionally assessment and evaluation have focused on the negative aspects or deficits of a client's presentation. Yet strengths, health, and those things that are going right in a person's life are key protective factors in the prevention and treatment of many mental health problems. Thus measuring strengths is an important component of a balanced assessment and evaluation process. This is the first compendium of more than 140 valid and reliable strengths-based assessment tools that clinicians, researchers, educators, and program evaluators can use to assess a wide array of positive attributes including well-being, mindfulness, optimism, resilience, humor, aspirations, values, sources of support, emotional intelligence, and much more. These tools provide a clear picture of an individual's strengths while being easy to complete, score, and interpret. The scales and instruments included are consistently formatted, are organized according to construct measures, and include tools for working with adults, couples, families, children, and special populations. They represent a wide range of theoretical approaches and were written by a diverse array of professionals including social workers, psychologists, nurses, physicians, and sociologists.

Partial List of Instruments: Adult Dispositional Hope Scale, Assessing Emotions Scale, Flourishing Scale, Five Facet Mindfulness Questionnaire, Positive States of Mind Scale, A Measure of Expectations for Partner, Multidimensional Sense of Humor Scale, Parenting Sense of Competence Scale, Personal Wellbeing Index, Proactive Coping Inventory, Psychological Empowerment Scale, Stress-Related Growth Scale, Social Wellbeing Scales, Wellness Beliefs Scale.

High Stakes Dale D. Johnson, Bonnie Johnson, 2006 High Stakes is a critical ethnography of an underfunded public elementary school in this era of accountability and high stakes testing. The book was written during the year the authors served as third and fourth grade teachers, and it juxtaposes the experiences of mostly minority children of poverty and their teachers with an examination of high stakes testing policies and the loss of a comprehensive education to political dictates.

Still Not Equal M. Christopher Brown, 2007 Still Not Equal: Expanding Educational Opportunity in Society addresses the successes and failures of Brown v. Board of Education and the Civil Rights Act of 1964, as well as the continuing challenge of expanding educational opportunity in the United States and across the Black diaspora. The educational, political, and social influence resulting from Brown, the Civil Rights Act, and their progeny have shaped the dynamics of the collective educational and social experiences of people of color. Notwithstanding the obstacles, barriers, and enablers of educational, occupational, and economic status, outcomes impact the formation and interpretation of public policy, specifically, and public perception generally, about racialized notions of schooling and learning. The pursuit of educational access, attendance, and attainment is intertwined with the implications of academic research and public policy to improve local practices in school settings. Inasmuch as a diverse research agenda, priorities, and activities become situated to critically address status and attainment outcomes in education from preschool through adulthood for African Americans in the United States and abroad, the resulting complexities in education and other settings will continue to behave in ways that cross racial
