*The Oxford Handbook of the South African Economy* Arkebe Oqubay, Fiona Tregenna, Imraan Valodia, 2021-11-18 While sharing some characteristics with other middle income countries South Africa is a country with a unique economic history and distinctive economic features It is a regional economic powerhouse that plays a significant role not only in southern Africa and in the continent but also as a member of BRICS However there has been a lack of structural transformation and weak economic growth and South Africa faces the profound triple challenges of poverty inequality and unemployment Any meaningful debate about economic policies to address these challenges needs to be informed by a deep understanding of historical developments robust empirical evidence and rigorous analysis of South Africa s complex economic landscape This volume seeks to provide a wide ranging set of original detailed and state of the art analytical perspectives that contribute to scientific knowledge as well as to well informed and productive discourse on the South African economy While concentrating on the more recent economic issues facing South Africa the handbook also provides historical and political context It offers an in depth examination of strategic issues in the country s key economic sectors and brings together diverse analytical perspectives

African Youth and the Persistence of Marginalization Danielle Resnick, James Thurlow, 2015-04-10 The much heralded growth and transformation of many economies in sub Saharan Africa over the last decade continues to receive prominent attention in academic scholarship

and among policy practitioners An apparent feature about this transformation however is that Africa's youth appear to have been left out This book critically examines the extent and consequences of the marginalization of African youth It questions conventional wisdoms about data trends aspirational goals and common policy interventions surrounding Africa's youth that have been variously propagated in both the development studies literature and in mainstream donor policy reports The book explores macro trends from both a temporal and cross regional perspective in order to highlight what is distinct about contemporary African youth and whether their prospects and behaviours do actually vary from their counterparts in other regions of the world or from previous generations of African youth Such studies include cross country analyses of youth employment patterns and modes of political participation in depth examination of the behaviours and aspirations of the urban youth and critical reflections on the impact of rural employment initiatives vocational education and learnership programmes The incorporation of multiple methods and disciplines as well as its attention to policy issues ensures that the book will be of great interest to graduate students researchers and professional researchers whose work lies at the intersection of African area studies and development studies as well as those focused on development economics political science and public policy and administration

**Colleges** Kraak, Andre, Paterson, Andrew, 2016-07-25 The Technical and Vocational Education and Training TVET college environment is marked by increasingly stark juxtapositions between what needs to be achieved in the post school education sector and the increasing difficulty of current conditions The triple challenge of poverty inequality and unemployment weighs heavily on the social political and economic fabric of the country and expectations are high that the TVET colleges can make a pivotal contribution to counter these challenges Despite laudable increases in TVET enrolment the education system needs to work harder to accommodate the weight of demand for post school further education and training FET band qualifications from young people not in education employment or training At the same time it is vital to secure adequate quality in TVET programmes which depend so much on the competence and commitment of college lecturers This collection offers a set of research papers that provide new analytic and empirical material on The political economy of TVET types in different countries which by comparison illuminate the South African case A periodisation of government interventions in the TVET sector over the last three decades The unsettled state and status of TVET lecturers in relation to their job requirements and conditions of service The halting evolution of collegial relationships between college lecturers towards higher collegiality Employer expectations of college graduates and how colleges are responding and An analysis of the outcomes of a college improvement intervention in Limpopo and the Eastern Cape This book will offer valuable information and insights for decision makers as well as analysts of institutional change concerning links between education and economic growth with particular regard to TVET graduates employment rates
