The Los Angeles Times' *Frontier* magazine contributor, Lawrence Sanders, says there were perhaps 100,000 illegal border crossings. The vast bulk of them, he estimates, were the result of human smuggling. The primary economic motivation for the Mexican government's border industrialization policies, he argues, is a second, more subtle one: the economy, if built to attract tourists and foreign investment, would mean a greater reliance on the United States, and Mexico would be dependent on the United States for all things.

- Abstract:** Students' attitudes towards studying the sciences prior to and upon the completion of their first course are investigated using the Attitudes Towards Science Survey and comparing the responses from the Science Department to the non-science departments. The study indicates that students' attitudes towards the sciences are positive throughout the study rather than declining at the end of the course.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

2. Once the problem is identified, the next step is to define the objectives and goals of the project. This helps to clarify what needs to be achieved and provides a clear direction for the team.

3. The third step is to develop a plan or strategy to address the problem. This involves breaking down the problem into smaller, manageable tasks and determining the resources needed to complete each task.

4. The fourth step is to implement the plan. This involves putting the strategy into action and monitoring progress regularly to ensure that the project is on track.

5. The final step is to evaluate the results of the project. This involves assessing the outcomes against the objectives and goals and identifying any areas for improvement.

**Figure 10. Time Series Plots**  
 Mean profit (left axis) and market return (right axis) for the 1980-1989 period. The figure shows the time series of the mean profit (left axis) and market return (right axis) for the 1980-1989 period. The mean profit is shown as a solid line, and the market return is shown as a dashed line. The x-axis represents time in years, from 1980 to 1989. The y-axis represents the return, ranging from -0.1 to 0.1. The mean profit is generally higher than the market return, and both series show a similar trend over the period.
