Koralturk,2015-11-09 PASS THE LEED GREEN ASSOCIATE EXAM WITH FLYING COLORS Having been widely adopted as the primary course material for bachelor s and master s degree classes in architecture and civil engineering in the universities all over the United States the LEED Green Associate V4 Exam Complete Study Guide provides deep insight into the principles of green building and helps the reader to learn rather than to memorize the essential information for the exam Thus this approach equips candidates to successfully pass the LEED Green Associate exam with flying colors in order to actively apply green building and LEED principles in real life This book is the only resource a candidate needs in order to successfully pass the exam As LEED v4 is quite different in comparison to the former versions the book was entirely re written thus it was not updated from a previous edition All of the chapters contain guidance on the aspects that require extensive attention while the book points out the finer details to focus on for the exam purposes It does not matter how much time passes after taking the exam as learning the real reasons behind the green building and LEED principles through observation will help to consolidate this information concisely Even though the LEED Green Associate exams are sometimes referred to as conceptual exams in reality the exam goes well beyond that Without diving into the LEED prerequisites and credits a candidate cannot ever guarantee passing the test as a result the book covers the core concepts of each LEED credit category and then evaluates the LEED prerequisites and credits to demonstrate how those green building concepts turn into real projects with LEED requirements Pass the LEED Green Associate exam with flying colors Thoroughly understand and apply the green building principles for life and retain all the information you have learned Apply the green building and

LEED principles in real life Know all the important things to consider during the exam beforehand The book is also recommended for students professionals and anyone who has not chosen to take an LEED professional exam but nonetheless retains a strong interest in LEED and green buildings **Guide to the LEED Green Associate Exam** Michelle Cottrell,2010-08-13 Proven strategies to pass the LEED Green Associate exam Here is the ideal study guide for understanding and preparing for the LEED Green Associate exam Written by an expert who is a LEED consultant and partner at Green Education Services a premier LEED exam preparation provider Guide to the LEED Green Associate Exam engages readers by breaking down difficult concepts in sustainable design and engineering in a clearly organized straightforward manner that helps streamline the learning process Serving as a valuable resource for anyone looking for the challenging LEED Green Associate credential Guide to the LEED Green Associate Exam features A thorough overview to understanding the LEED certification process A collection of sample test questions and study tips to reinforce learned material An accessible and stimulating approach that fosters quicker retention A set of strategies for summarizing critical information and details more effectively A wealth of material that includes drawings charts and diagrams to help understand concepts visually A total of 128 sample flashcards that allow you to study on the go Covering basic knowledge of green design construction and operations for professionals who want to demonstrate green building expertise in nontechnical fields of practice this book is the ultimate companion for achieving successful results on the LEED Green Associate exam **The Complete Guide to Green Building & Remodeling Your Home** Martha Maeda,2011 In today s economy and socially conscious environment regarding the environment many people cannot afford not to start considering ways they can build or remodel their home to ensure it is green With scientific sources such as the UN council on global warming making statements about the degradation of ice flow and environmental conditions by 2050 and the likelihood that crude oil sources will be used up within the next fifty years it is especially necessary for young families to consider the implications of re examining their homes and living situations to be more green This book will guide you and your family through the process of learning more about and implementing the necessary changes and perspectives needed to change your home or build a new home that is environmentally conscious and prepared for the changing economic and environmental climate in the coming decades You will learn why people have started to build green and how it can be done in today s regulatory and cost conditions quickly and inexpensively You will learn how to remodel with green in mind and how to start working with building professionals that can provide the necessary materials plans and paperwork you need to proceed You will learn which materials are best for green building by lifespan and how to choose between various green materials You will learn how to not only use green materials but to make sure the construction process is green as well You will learn the basics of framing your building natural building methods the energy systems you might use and the heating cooling options at your disposal Construction and environmental experts have been interviewed and their expertise is included in this book to help

you learn everything you need to accomplish the above as well as to know what kinds of water and waste systems are best how to site plan and landscape your home and what the most common myths about green building are You will learn ten things you can do on any building project to keep it green and any materials you should always have on hand for anything you do around the house Regardless of whether you are just looking to remodel to make your house greener or are building a new home this book will give you everything you need to stay green and respect the environment with your home

*LEED v4 Green Associate Exam Guide (LEED GA)* GangChen,2014-08-01 Pass the LEED Green Associate Exam Get Your Building LEED Certified Fight Global Warming and Save Money The USGBC released LEED v4 at the GreenBuild International Conference and Expo in November 2013 The GBCI started to include the new LEED v4 content for all LEED exams in late Spring 2014 We have incorporated the new LEED v4 content in this book Starting on December 1 2011 GBCI began to draw LEED Green Associate Exam questions from the second edition of *Green Building and LEED Core Concepts Guide* We have incorporated this information in our book *LEED Leadership in Energy and Environmental Design* is one of the most important trends of development and is revolutionizing the construction industry It has gained tremendous momentum and has a profound impact on our environment From this book you will learn how to do the following 1 Pass the LEED Green Associate Exam 2 Use LEED exam preparation strategies study methods tips suggestions mnemonics and exam tactics to improve your exam performance 3 Effectively understand digest and retain your LEED knowledge 4 Understand the process of registering and certifying a building for LEED 5 Understand the scope main intent core concepts and strategies as well as identify the regulations recognition and incentives for each major LEED category 6 Identify the strategies for case studies 7 Identify the synergy in case studies 8 Implement the most important LEED related codes and building standards 9 Get points for categories not yet clearly defined by the USGBC This book fills in the blanks and demystifies LEED It uncovers the secrets

codes and jargon for LEED as well as the true meaning of going green. It provides a solid foundation and fundamental framework for LEED. It covers every major aspect of LEED in plain and concise language and introduces it to ordinary people. This guide is small and easy to carry around. You can read it whenever you have a few extra minutes. It is an indispensable book for ordinary people, developers, brokers, contractors, administrators, architects, landscape architects, civil, structural, mechanical, electrical, and plumbing engineers, interns, drafters, designers, and other design professionals. What others are saying about LEED Green Associate Exam Guide Part I: Finally, a comprehensive study tool for LEED GA Prep. I took the one-day Green LEED Green Associate course and walked away with a power point binder printed in very small print which was missing MUCH of the required information. Although I didn't know it at the time, I studied my little heart out and took the test only to fail it by 1 point. Turns out I did NOT study all the material I needed to in order to pass the test. I found this book, read it, marked it up, retook the test, and passed it with a 95%. Look, we all know the LEED Green Associate Exam is new and the resources for study are VERY limited. This one is the VERY best out there right now. I highly recommend it. Consultant VA Complete overview for the LEED Green Associate exam. I studied this book for about three days and passed the exam. If you are truly interested in learning about the LEED system and green building design, this is a great place to start. **LEED v4 BD&C EXAM GUIDE** Gang Chen, 2015-06-26. Pass the LEED AP BD. They are helpful as reference manuals because of the easy-to-follow format. Definitely a keeper in my bookshelf for future project reference. Karen M. Scott: Great resource for studying for the LEED Exam. I have taken and passed the LEED AP BD&C exam and know what it takes. As this author says, it's not an easy exam, and he is right. What is critical to passing is having great teaching tools, and this book is one of them. He touches on every aspect of how to memorize data, how questions are formed, what to expect on tricky questions, the content the test writers are looking for, and every little detail you need to know when preparing for this exam. I highly recommend this author's books if you are serious about passing any of the LEED exams. Hopefully on the first try. S. Jennifer Sakiewicz: LEED BD. It gave me insight and knowledge on how credits are applied. Some questions in your book helped me answer ones on the test. Good book. I'll go through it once again when I appear for AP. Haresh Vibhakar: AIA India AIA LEED Green Associate Architect. A good outline. The book is an excellent outline to learn the necessary items required to study for the exam. It is not a comprehensive study guide in and of itself. Practice exam is good indicator of test preparation. Paul Levine: Solid LEED Study Guide. This is the kind of book I wish was available when I did my original LEED AP exam. It teaches you how to study, which is so important when school is a distant memory. The bulk of the book helps you review and memorize with mnemonics the concepts for each credit that you need to know for the exam. The questions are good representations of questions on the exam. I would recommend to anyone studying for their exam that they first read the chapters in this book on

how to study Second read the actual LEED BD C guide to give you the background information on the credits and gain comprehension Underline and review as the author indicates to get the most out of your study time Finally read the rest of this exam guide to help you review and memorize for the exam missfitz missfitz Very Helpful Guide Gang Chen s LEED BD C Exam Guides very helpful in consolidating information from USGBC and GBCI sources as well as providing the information that is necessary for the exam without excess irrelevant information I highly recommend this book for preparation for the LEED BD C exams leedap
