Studies Tara Brabazon, Steve Redhead, Runyararo S. Chivaura, 2018-11-24 This book addresses the seismic political events of Donald Trump s presidency and the British vote to leave the EU It explores why citizens vote against their own best interests and demonstrates the role and value of universities in a time when evidence expertise and facts often dissolve into opinion emotion and fake news Domination and Emancipation Daniel Benson, 2021-11-01 A melancholy defeatism has become a

hallmark of critical thought and leftist politics A consequence of this has been an exaggerated focus on domination among critical theorists leaving emancipation along with questions of political organization and strategy undertheorized at best or disregarded as delusional at worst If emancipation still plays a role in critical reflection it is most often in a domesticated form made into a bedfellow of centrist liberalism Recent events necessitate a different outlook especially since the financial collapse of 2008 and the myriad movements emancipatory as much as reactionary it has spawned throughout the world Through a series of dialogues and reflections by leading thinkers scholars and activists *Domination and Emancipation Remaking Critique* seeks to rebuild the emancipatory pole of critique and bring forward theoretical work that is in step with the struggles and aspirations of the moment *Play Among Books* Miro Roman, Alice _ch3n81, 2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science
