*Fundamentals of Educational Measurement with the Elements of Statistical Method* Chester Arthur Gregory,1922 This book is an attempt to bridge in part a gap between theory and practice in educational tests and measurements Most of the books on the subject have been rather technical pre supposing considerable training on the part of readers or they have been manuals of directions for giving the tests and scoring the papers with little reference to the problems confronting those attempting to measure educational processes and products This book deals with this subject in an evolutionary fashion so that teachers and students may see how problems have arisen the attempts at solutions and therefore understand the principles of testing and measurement The book aims to present these fundamental principles as far as possible in non technical language and to confine the statistical treatment of the data to simple operations in arithmetic
