Minorities Of Europeanization The New Others Of European Social Identity:

Minorities of Europeanization Hakan Ovunc Ongur, 2014-11-13 What are the societal effects of Europeanization How successful is the EU's project to create an overarching European identity representative of all its citizens transcending national boundaries and including those previously excluded as national minorities This study addresses these questions by adapting the Social Identity Theory's SIT concept of social identity to the discussions of European identity offering a novel approach that remedies previous definitional and ontological problems of the term The conceptualization of a European social identity is generated here to invite a reconsideration of conventional understandings of how minorities group identities are formed Presenting itself as a challenge to nations and nationality the European integration process has yet to achieve its supra national ideal falling instead into the trap of nationalizing those who are subsumed under the category of minorities in practice arguably because of a faulty theoretical understanding of the term The new Others of Europeanization have been chosen specifically to emphasize despite the EU's united in diversity rhetoric the marked lack of united destiny and common heritage of selected European nationals Among these new Others Russophones in the Baltic states the Roma people populations of the Western Balkans immigrants and guest workers and Muslims residing in European countries have all been excluded from Europe's new social identity Through in depth historical analysis this book aims to correct this problem

providing both European studies and broader political science literatures with a new understanding of minorities that is more dynamic both in practice and theory THE HISTORICAL FORMATION OF GERMANY'S EUROPEAN IDENTITY Dr. Melek Aylin Özoflu, 2024-06-17 The European integration process aimed to foster a sense of common European identity enhancing the European public's sense of belonging and identification with the European community This goal is vividly reflected in Jean Monnet's 1952 statement We are not bringing together states we are uniting people In this context forming a collective European identity has emerged as a process in the making boosted often by the symbols of solidarity such as common currency motto flag and anthem This book delves into the historical process of European identity formation in Germany presenting a unique case where its post war national identity was constructed hand in hand with the European identity resulting in relatively higher levels of identification compared to other member states While doing this it leverages the core principles of Social Identity Theory SIT to enlighten the temporal dimensions of identity i.e. past present and future reflecting upon the continuity within the Europeanization and EUization processes This book provides readers with a deeper understanding of the historical foundations of the European identity and its successful blossoming in Germany Its extensive literature review contributes significantly to European studies making it an essential read for scholars and enthusiasts alike
