Practicing Econometrics William E. Griffiths, R. Carter Hill, George G. Judge, 1993-03-02 Designed to promote students understanding of econometrics and to build a more operational knowledge of economics through a meaningful combination of words symbols and ideas Each chapter commences in the way economists begin new empirical projects with a question and an economic model then proceeds to develop a statistical model select an estimator and outline inference procedures Contains a copious amount of problems experimental exercises and case studies      *Microeconomics* Fred R.
