Principles and Methods in Landscape Ecology A. Farina, 2013-04-17 Currently considered a bridge between basic and applied ecology landscape ecology occupies an important new niche in ecology representing a new the other in developing a good educational framework in the galaxy of the ecological sciences work Both are important and not in conflict In this However the broad spectrum of conceptual and spirit I have prepared this book with the aim of methodological approaches has created a non summarizing the best theories concepts principles focused science strongly influenced by the more and methods in landscape ecology It is an attempt dominant disciplines such as landscape planning to reinforce the ecological research perspective to and restoration forest management landscape consolidate principles and methods validate process architecture etc duress and reconcile different positions including The uncertain position of landscape ecology the geobotanical animal and human perspectives among the ecological disciplines is in contradiction The concept is very simple I have no ambition with the general recognition that landscape is a space to present new ideas and theories I have worked to a third dimension in which important ecological create a tool mainly for classroom use but also processes occur and landscape is becoming very appealing to a broad range of scientists and practitioners popular in many ecology related fields from plant ecologists dealing with landscape ecology and its disease to animal behaviour problems

Aviation Psychology and Human Factors Monica Martinussen, David R. Hunter, 2009-09-28 While it is true that fortune favors the prepared mind in the field of aviation it may be equally true that misfortune often punishes an unprepared mind To be fully prepared pilots must have comprehensive knowledge of weather aerodynamics propulsion navigation and all the other technical disciplines However they must also have a comprehensive understanding of the component that is simultaneously the most fragile and most resilient the most unreliable and the most adaptable the human being *Aviation Psychology and Human Factors* explores the application of psychological principles and techniques to the specific situations and problems of aviation It provides a complete overview of the role of psychology in the field of aviation The authors address the contribution of psychology in the design of aviation systems the selection and training of pilots the psychological characteristics of pilots that may relate to aviation safety and to the behavior of passengers They cover key concepts of psychological research and data analysis at a depth that fosters a greater appreciation of how these tools are used in the development of new psychological knowledge A keener understanding of aviation psychology will better prepare pilots for the demands that aviation will make While many books cover this subject for psychologists very few if any present the material to pilots With balanced coverage that makes the material accessible to both this book makes pilots aware of the positive impact psychology and its application can have on improving aviation operations providing specific information that pilots can use in their daily operations It gives psychologists a better understanding of how their discipline is applied to aviation while giving pilots the tools to better evaluate and implement
