De Montigny, 1995 In this unique work Gerald A J de Montigny maintains that social workers along with other professionals create an institutional reality through their day to day practices He traces the practical ways that social workers when involved in child protection struggle to produce a world which can be ordered systematized and subjected to their powers Social workers in their everyday practice make sense of a confusing collection of case details to create organizationally defined problems and cases De Montigny uses the tension between his experience of growing up working class and the difficult process of becoming a social worker to explore the practical activities professionals use to secure organizational power and authority over clients In the first half of the book de Montigny focuses on the practices social workers use to produce a universalized professional form of knowledge He examines social workers use of ideological practices fetishization of the social work profession insertion of details from clients lives into discursive order accounting for front line practice as a problem solving scientific practice and naming of their own frustrations conflicts tensions and pain as professionally manageable phenomena In the second half of the book based on his own work in child protection he systematically examines how such reality producing practices come to be expressed as child protection and develops a synthetic account of his social work interventions in cases of child abuse and neglect This book should be read by all practitioners and students of social work It is an original and practical application of theoretical arguments to the everyday reality of social work
