Micro Finance And Women:

Micro Finance and Women Empowerment Murlidhar A. Lokhande, 2014 In India micro finance is a movement with the underlying objective of helping poor households to have access to financial services including credit at affordable cost Many of those who promote micro finance believe that such access will help poor people get out of poverty For others micro finance is a way to promote economic development employment and growth through the support of micro entrepreneurs and small businesses Women in India are typically poorer than men and have fewer options for earning a livelihood that provides adequate food housing and education for their children However they are also viewed as the change agents of the family Women are more likely to invest their earnings into improving the lives of the families By encouraging women to take charge of their futures micro finance institutions can impact families and whole communities However the pace of women empowerment in India through micro finance is slow due to a variety of constraints which urgently need to be rooted out This book examines some of the issues that need to be addressed in order to empower the lives of India s women through micro finance

Micro-Credit, Poverty and Empowerment Neera Burra, Joy Deshmukh-Ranadive, Ranjani K Murthy, 2005-11-05 Two persistent problems that affect a significant portion of Indian women are poverty and violation of their human rights In recent years micro credit has come to be viewed as a vital tool to ameliorate both conditions However there are few studies in the Indian context which test the validity of the assumption that there is a linear link between micro credit poverty reduction and women s empowerment This important and thought provoking volume brings together revealing case studies of micro credit interventions made by six non governmental and quasi governmental bodies in five states of peninsular India several of which have been supported by the United Nations Development Programme UNDP The six case studies are diverse in terms of their socio economic and geo political contexts the nature and ideological orientation of the intermediary organizations the groups targeted by the projects exclusively women or men and women and the life spans of the projects Despite their differences all the studies offer useful lessons on the institutional structures and processes that do or do not facilitate women s empowerment and poverty reduction while exploring the potential and limitations of micro credit to achieve these twin goals

Nawaz,2019-03-01 This book examines the effects of policies and practices of microfinance NGOs in empowering rural women in Bangladesh Nawaz seeks to unpack the untold narratives of women s empowerment and to fill the current knowledge gap in this area The book goes beyond the narrow minimalist evaluation of microfinance that only focuses on women s economic empowerment through their ability to access financial resources Rather it looks at whether and how microfinance empowers women in a holistic manner across the socio cultural psychological and political spheres of life The author argues that microfinance reduces levels of poverty which means that women are better able to meet their practical gender needs however they are not empowered unless they are also able to meet their strategic gender needs including the transformation of gender power relations from the household to state arenas Therefore the book argues that in order to bring about higher levels of empowerment microfinance programs must be combined with other services such as financial literacy socioeconomic training education healthcare social mobilization and legal support Microfinance and Women s Empowerment in Bangladesh will be of interest to students and scholars across a range of disciplines including Gender Studies Development Studies and Politics **Women and Microfinance in the Global South** Lynn Horton,2018 Women and Microfinance in

Making Women Pay Smitha Radhakrishnan, 2021-10-25

In *Making Women Pay* Smitha Radhakrishnan explores India's microfinance industry which in the past two decades has come to saturate the everyday lives of women in the name of state led efforts to promote financial inclusion and women's empowerment. Despite this favorable language Radhakrishnan argues microfinance in India does not provide a market oriented development intervention even though it may appear to help women borrowers. Rather this commercial industry seeks to extract the maximum value from its customers through exploitative relationships that benefit especially class privileged men. Through ethnography interviews and historical analysis Radhakrishnan demonstrates how the unpaid and underpaid labor of marginalized women borrowers ensures both profitability and symbolic legitimacy for microfinance institutions their employees and their leaders. In doing so she centralizes gender in the study of microfinance reveals why most microfinance programs target women and explores the exploitative implications of this targeting.
