Drawing on a fifteen-year scientist-teacher collaboration, more than 100 years of research on learning, and rich experiences from educators in K-12 and higher education, the authors present highly accessible, step-by-step guidance on how to transform teaching with four essential strategies: Retrieval practice, spacing, interleaving, and feedback-driven metacognition. With Powerful Teaching, you will develop a deep understanding of powerful teaching strategies based on the science of learning. Gain insight from real-world examples of how evidence-based strategies are being implemented in a variety of academic settings.
