Investigating Complex Phenomena: Bridging between Systems Thinking and Modeling in Science Education

Tom Bielik, Moritz Krell, Laura Zangori, Orit Ben Zvi Assaraf, 2023-11-15 Understanding the complexity of the natural world and making sense of phenomena is one of the main goals of science and science education. When investigating complex phenomena such as climate change or pandemic outbreaks, students are expected to engage in systems thinking by considering the boundaries of the investigated system, identifying the relevant components and their interactions, and exploring system attributes such as hierarchical organization, dynamicity, feedback loops, and emergence. Scientific models are tools that support students' reasoning and understanding of complex systems, and students are expected to develop their modeling competence and to engage in the modeling process by constructing, testing, revising, and using models to explain and predict phenomena. Computational modeling tools, for example, provide students with the opportunity to explore big data, run simulations, and investigate complex systems. Therefore, both systems thinking and modeling approaches are important for science education when investigating complex phenomena.

Skills Based Health Education - Book Only Mary Connolly, 2011-01-06 Skills Based Health Education provides pre-service and practicing teachers with the pedagogical foundation and tools to develop a comprehensive PreK-12 health education program using the National Health Education Standards. Rather than solely focusing on teaching content, an approach which can prove ineffective in developing healthy behaviors, readers learn to teach the content and skills their students need to be healthy and prepared for the 21st century. The book addresses each one of the national standards with specific directions regarding how to apply the standard and performance indicators to plan and implement performance tasks that target instruction to a student's need. Readers are shown how to establish student need, select content, and skill performance indicators to meet the need, and plan and implement assessment and instruction. PowerPoint Presentations and a TestBank are available as free
