

Research Proposal Guidelines

Purpose

The purpose of developing a research proposal is to exercise what you have learned in class and apply your knowledge to a clinical problem in which you have an interest. A research proposal has a specific format depending upon your audience that will be reading it or the funding agency requirements. You will use the format listed in the Design section.

Procedure

Identify a clinical problem of interest to you and develop a research project proposal. Use the specific format below. The paper must follow APA, 5th edition format style and be less than 25 pages (including tables and/or figures and the references). You may want to identify a problem early in class and use the discussion time to help formulate the research question.

Design

The following format is to be used. It is recommended to use two or three level headings (see your APA manual for assistance). Your main headings are listed below.

- **Specific Aims**

List the broad, long-term objectives and what the specific research proposed is intended to accomplish.

- **Background and Significance**

Briefly sketch the background leading to the present study, critically evaluate the existing knowledge, and specifically identify the gaps that the study is intended to fill. State concisely the importance and social work health relevance of the research described. What makes this research project significant as it relates to your specific aims?

- **Research Design/Methods**

Describe the research design and the procedures to be used to accomplish the specific aims. Include how the data will be collected, analyzed, and interpreted. Describe any new methodology and its advantage over existing methodologies. Discuss the potential difficulties and limitations of the proposed procedures and alternative approaches to achieve the aims. As a part of this section, provide a tentative timetable. You may want to divide this section into subsections to keep your proposal clear and easy to follow.

- **Human Subjects Protection**

- **Risks to the subjects.** Describe the proposed involvement of human subjects in the work outlined. Describe the characteristics of the subject population, including their anticipated number, age range. List inclusion and exclusion criteria.

- **Sources of Material.** Identify the sources of research material obtained from individually identifiable living human subjects in the form of specimens, records, or data. Indicate whether the material or data will be obtained specifically for research purposes.

The author of several books, McKay is best known for coediting the canon-making Norton Anthology of African American Literature with Henry Louis Gates Jr, which helped secure a place for the scholarly study of Black writing that had been ignored by white academia. However, there is more to McKay's life and legacy than her literary scholarship. After her passing, new details about McKay's life emerged, surprising everyone who knew her. Why did McKay choose to hide so many details of her past? Shanna Greene Benjamin examines McKay's path through the professoriate to learn about the strategies, sacrifices, and successes of contemporary Black women in the American academy. Benjamin shows that McKay's secrecy was a necessary tactic that a Black working-class woman had to employ to succeed in the white-dominated space of the American English department. Using extensive archives and personal correspondence, Benjamin brings together McKay's private life and public work to expand how we think about Black literary history and the place of Black women in American culture. *The Professor Is In* Karen Kelsky, 2015-08-04 The definitive career guide for grad students, adjuncts, post-docs, and anyone else eager to get tenure or turn their Ph.D. into their ideal job. Each year, tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year, only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site *The Professor Is In*, she has helped countless Ph.D.s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single, handy guide that addresses the most important issues facing any Ph.D., including: When, where, and what to publish; Writing a foolproof grant application; Cultivating references and crafting the perfect CV; Acing the job talk and campus interview; Avoiding the adjunct trap; Making the leap to non-academic work when the time is right. *The Professor Is In* addresses all of these issues and many more. *Labor Pains* Michael Hogan, 2008-06-27 By the middle of the first decade of the 20th Century, the Labor Party in New South Wales, the Political Labor League, had become the official Opposition in the NSW Parliament.
