Modeling with Mathematics Nancy Butler Wolf, 2015 Nancy s in depth look at mathematical modeling offers middle school teachers the kind of practical help they need for incorporating modeling into their classrooms Cathy Seeley Past President of NCTM author of *Faster Isn t Smarter and Smarter Than We Think* This is the book that math teachers and parents have been waiting for Nancy provides a comprehensive step by step guide to modeling in mathematics at the middle school level David E Drew author of *STEM the Tide Reforming Science Technology Engineering and Math Education in America* We all use math to analyze everyday situations we encounter Whether we realize it or not we re modeling with mathematics taking a complex situation and figuring out what we need to make sense of it In *Modeling with Mathematics* Nancy Butler Wolf shows that math is most powerful when it means something to students She provides clear friendly guidance for teachers to use authentic modeling projects in their classrooms and help their students develop key problem solving skills including collecting data and formulating a mathematical model interpreting results and comparing them to reality learning to communicate their solutions in meaningful ways This kind of teaching can be challenging because it is open ended it asks students to make decisions about their approach to a scenario the information they will need and the tools they will use But Nancy proves there is ample middle ground between doing all of the work for your students and

leaving them to flail in the dark Through detailed examples and hands on activities Nancy shows how to guide your students to become active participants in mathematical explorations who are able to answer the question What did I just figure out Her approach values all students as important contributors and shows how instruction focused on mathematical modeling engages every learner regardless of their prior history of success or failure in math **Learning How to Teach**
