Early Modern** Alan Stewart, 2018-05-10

The Oxford History of Life Writing Volume 2 Early Modern explores life writing in England between 1500 and 1700 and argues that this was a period which saw remarkable innovations in biography autobiography and diary keeping that laid the foundations for our modern life writing The challenges wrought by the upheavals and the sixteenth century English Reformation and seventeenth century Civil Wars moulded British and early American life writing in unique and lasting ways While classical and medieval models continued to exercise considerable influence new forms began to challenge them The English Reformation banished the saints lives that dominated the writings of medieval Catholicism only to replace them with new lives of Protestant martyrs Novel forms of self accounting came into existence from the daily moral self accounting dictated by strands of Calvinism to the daily financial self accounting modelled on the new double entry book keeping This volume shows how the most ostensibly private journals were circulated to build godly communities how women found new modes of recording and understanding their disrupted lives how men started to compartmentalize their lives for public and private consumption The volume doesn't intend to present a strict chronological progression from the medieval to the modern nor to suggest the triumphant rise of the fact based historical biography Instead it portrays early modern England as a site of multiple sometimes conflicting possibilities for life writing all of which have something to teach us about how the period understood both the concept of a life and what it meant to write a life

Modern Business: Accounting practice Joseph French Johnson, 1914 **Institutions and the Evolution of Modern Business** Mark Casson, Mary B. Rose, 2014-01-14

The papers in this volume demonstrate that it can be fruitful to apply institutional theory to business history In addition the volume shows that the wider study of the institutional environment is inseparable from the study of business It is clear however that although institutionalism in business history has a long pedigree many areas of research and potential interaction with theory remain to be explored The extent to which this will occur inevitably depends upon the degree to which the interests of theoreticians serve the needs of historians and vice versa
