

OPERATING PROCEDURES

CAUTION: Do not attempt to remove material from mower while it is in operation. Allow rotating disks to stop before leaving tractor.

IMPORTANT: Never operate mower without crop divider caps (A).

1. Always allow a few minutes for oil to spread in cutterbar before engaging PTO when changing cutterbar from transport to operating position.
2. Always operate tractor at 540 rpm. Do not overspeed. Overspeeding could damage mower and will cause stripping in light crops.
3. Regulate ground speed according to crop conditions. A slower ground speed may have to be used in heavy down crop.
4. Open fields by cutting back swath first.
5. Continue to mow around the field in a clockwise direction. It may be necessary to slow down ground speed to turn corners.
6. Turn or replace knives (B) before they become excessively worn. (See Replacing Cutterbar Knives in the Service Section.)

AA7E25513 E55/R5M1 1 250984

7. (260) To operate cutterbar in excess of 10 degrees below the horizontal, remove two bolts (A) and extend the length of the lift rod (B). Install bolts (A).
