Topic: The Human Body (Skeletal System and Movement)

Introduction

The human body has a bony framework known as the skeleton which gives the body shape, rigidity, support, etc. These supporting structures in the organism which helps the body in running, jumping, moving from place to place and bending to pick objects form the skeletal system. These acts of changing position from one point or position to another, or from one direction to another is known as movement.

In fact, the body of animals consists of:

1. Bones called skeletons
2. Flesh called muscles
3. Fluid called blood
