Maths Lit Caps Lesson Plans Gauteng:

Knowledge, Curriculum and Equity Brian Barrett, Ursula Hoadley, John Morgan, 2017-07-20 In 2008 the first in a series of symposia established a social realist case for knowledge as an alternative to the relativist tendencies of the constructivist post structuralist and postmodernist approaches dominant in the sociology of education The second symposium focused on curriculum and the development of a theoretical language grounded in social realism to talk about issues of knowledge and curriculum Finally the third symposium brought together researchers in a broad range of contexts to build on these ideas and arguments and with a concerted empirical focus bring these social realist ideas and arguments into conversation with data Knowledge Curriculum and Equity Social Realist Perspectives contains the work of the third symposium where the strengths and gaps in the social realist approach are identified and where there is critical recognition of the need to incrementally extend the theories through empirical study Fundamentally the problem that social realism is seeking to address is about understanding the social conditions of knowledge production and exchange as well as its structuring in the curriculum and in pedagogy The central concern is with the on going social reproduction of inequality through schooling and exploring whether and how foregrounding specialised knowledge and its access holds the possibility for interrupting it This book consists of 13 chapters by different authors working in Oceania Asia Europe Africa and North America From very different vantage points the authors focus their theoretical and empirical sights on the assumptions about knowledge that underpin educational processes and the pursuit of more equitable schooling for all Making Education Inclusive Sharon Moonsamy, Elizabeth Walton, 2015-09-18 Exclusionary pressures and practices are pervasive in education despite the clamour for more inclusive education Even as classrooms worldwide become more diverse education is unlikely to become inclusive without deliberate efforts to dismantle exclusion and enable inclusion This book is a compilation of contributions to the conversation about what these efforts might entail The conversation has its origins in the Making Education Inclusive Conference held in 2013 which brought together academics and practitioners from Southern Africa and other countries Given the expectation that teachers should play a key role in promoting inclusion it is not surprising to find significant interest in teacher education from many of the contributing authors Their concerns range from explicit teacher development for pedagogical responsiveness to learner diversity to overcoming the epistemological marginalisation that learners experience where teachers are not fully confident of their subject content and how to teach it Access to education is clearly not enough and other contributors to this book concern themselves with ways in which structures and systems could be reconstituted to enable meaningful inclusion This might mean looking at how teachers might use tiered systems of behaviour support and various metacognitive strategies how physical access can be promoted on a university campus and understanding how parents think about disability Each chapter represents a different perspective on what it might mean to resist educational exclusion in its many forms and each offers possible ways to make education more inclusive Twenty

Years of Education Transformation in Gauteng 1994 to 2014 Felix Maringe, Martin Prew, 2015-05-05 Twenty Years of Education Transformation in Gauteng 1994 to 2014 An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994 These essays talk to what a provincial education department does and how and why it does these things whether it be about policy resourcing or implementing projects Each essay is written by one or more specialist in the relevant focus area The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years both nationally and provincially There has been no attempt to fit the books chapters into a particular ideological or educational paradigm and as a result the reader will find differing views on various aspects of the Gauteng Department of Educations present and past We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years

Effects of Government Mandates and Policies on Public Education in Africa, the Caribbean, and the Middle East Cynthia S Sunal, Oluseyi Matthew Odebiyi, Kagendo Mutua, 2022-06-01 As the demand for education at all levels has increased so have the models of meeting these increased demands for education As in many other parts of the world public education has expanded to serve large populations across the regions of Africa the Caribbean and the Middle East Many nations in these regions have instituted mandates policies and frameworks intended to simultaneously increase access to public education opportunities as well as improve the quality of education provided and to address a wide populace Because the increase in educational demand has occurred at all levels these efforts often address various levels of education from early childhood through primary schooling junior secondary and secondary schooling and into tertiary education Efforts also have been made to increase participation in education by marginalized and or special populations The range of efforts is large with some focusing on involving migrants immigrants refugees in primary education while others aim at opening up choices at the university level Recently nations in the region have recognized the possibilities of digital learning online learning as cell phones and other widely used portable wireless devices have made it possible to sell the idea that one can learn from anywhere at any time This widespread access to technology has made it possible for governments as well as private entities to expand learning opportunities even to populations previously unreached or to address difficult to reach sectors of the population At the same time the population itself has not only increased in numbers but in diversity Maintaining quality through digital and other means of quick expansion of educational opportunities continues to be challenging if not problematic Effects of Government Mandates and Policies on Public Education in Africa the Caribbean and the Middle East is Book IX of the series Research on Education in Africa the Caribbean and the Middle East Chapters document describe and or raise critical issues and or questions resulting from government policies mandates and frameworks intended to make available public education to an ever growing populace while at the same time being mindful

of improving quality of education being availed to an increasingly diverse populace

South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

The 4IR and teacher education in South Africa Felix Maringe, Otilia Chiramba, 2024-02-26 The 4IR has become an overarching framework within which education systems including teacher education are operating Contingent upon the ideology of neo liberalism the 4IR seeks to transform societies in ways which respond to the relentless developments in technology the Internet and digital capacities which by design and intent are purposed at increasing both productivity and the associated quality while at the same time reducing human intervention in the same processes In teacher education how we teach and train student teachers will be substantially influenced by the imperatives of the 4IR There are multiple unresolved questions as the 4IR takes centre stage For example what will it mean for teaching and learning in schools that have severe technological and digital deficits for teachers and students who have minimal technological literacies for

delivering high quality teaching and learning for transforming both the content and pedagogies of teacher education and above all for delivering socially just educational experiences for all our learners regardless of class race and privilege The discourse of the 4IR is contemporary and requires multiple perspectives to explore what it means in different contexts and settings the understandings it engenders in people what it implies across a wide range of educational decision making levels and that its fundamental assumptions cohere with national and societal assumptions about equality equity and social justice Multiple methodological approaches were utilised in the interrogation of the idea of the 4IR in teacher education in South Africa including theoretical empirical and small scale case studies amongst others The data these approaches provide are equally valued based on the purposes for which they have been derived
