Fig. 1—Components Covered in this Manual

This service manual contains service and maintenance information for John Deere 340 and 340 Cyclone and 340 and 340 L Series snowmobiles.

This manual is divided into sections, with each section covering a certain component or operational system. The information is divided into groups within each section.

Emphasis is placed on diagnosing malfunctions, analysis and testing. Diagnosing malfunctions lists possible troubles, their causes, and how to correct them. These troubles are analyzed to help you understand what is causing the problem, so it can be corrected rather than just replace parts.

Specifications are found in the last group of each section. Special service tools are in Section 70.

Hood, console, tunnel and pan repair are not covered in this service manual. Minor cracks and holes in hood, console or fiberglass pans can be

repaired using plastic patching kits or fiberglass repair kits. These kits are available at local auto supply stores.

On snowmobiles with aluminum pans, minor tunnel and pan damage can be repaired by pop-riveting soft 0.060-inch (1.524 mm) aluminum over the tear, crack or puncture. If the pan and tunnel are damaged extensively, a complete assembly is available.

A pan reinforcement for aluminum pans is available and can be pop-riveted over the damaged pan.

A This safety alert symbol identifies important safety messages in this manual. When you see this symbol, be alert to the possibility of personal injury and carefully read the message that follows.

NOTE: Metric equivalents have been included, where applicable, throughout this service manual.

This manual may be kept in its own cover, or it may be removed and filed in your service manual rack or Consumer Products Service Information Binder.
