Essential reading for teachers education administrators and policymakers alike STARRED Library Journal The untold story of the root cause of America s education crisis It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country s frustrating lack of progress when it comes to providing every child with a quality education The problem wasn t one of the usual scapegoats lazy teachers shoddy facilities lack of accountability It was something no one was talking about the elementary school curriculum s intense focus on decontextualized reading comprehension skills at the expense of actual knowledge In the tradition of Dale Russakoff s *The Prize* and Dana Goldstein s *The Teacher Wars* Wexler brings together history research and compelling characters to pull

back the curtain on this fundamental flaw in our education system one that fellow reformers journalists and policymakers have long overlooked and of which the general public including many parents remains unaware But The Knowledge Gap isn't just a story of what schools have gotten so wrong it also follows innovative educators who are in the process of shedding their deeply ingrained habits and describes the rewards that have come along students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed If we truly want to fix our education system and unlock the potential of our neediest children we have no choice but to pay attention

The Cycle of Leadership Noel M. Tichy, 2009-03-17 In *The Leadership Engine* Noel Tichy showed how great companies strive to create leaders at all levels of the organization and how those leaders actively develop future generations of leaders. In this new book he takes the theme further showing how great companies and their leaders develop their business knowledge into achievable points of view. Spend a great portion of their time giving their learnings to others sharing best practices and how they in turn learn and receive business ideas knowledge from the employees they are teaching. Calling this exchange a virtuous teaching cycle Professor Tichy shows how business builders from Jack Welch at GE to Joe Liemandt at Trilogy create organizations that foster this knowledge exchange and how their efforts result in smarter more agile companies and winning results. Some of these ideas were showcased in Tichy's recent Harvard Business Review article entitled *Ordinary Boot Camp*. Using examples from GE Ford Dell Southwest Airlines and many others Tichy presents and analyzes these principles in action and shows how managers can begin to transform their own businesses into teaching organizations and consequently better performing companies. **Middle School Journal**, 2007
