House of Commons - Transport Committee: Cost of Motor Insurance: Whiplash - HC 117 Great Britain: Parliament: House of Commons: Transport Committee, 2013-07-31 Whiplash injuries can have debilitating consequences for those who suffer them However some of the increase in whiplash claims will have been due to fraud or exaggeration The Government must tighten up the requirements for motor insurance claims and ensure that insurers honour their commitment to reduce premiums The Government should consider requiring claimants to provide proof that they have either been seen by a doctor or attended A E shortly after the accident The MPs also note that their previous recommendation on making the links between insurers and other parties involved with claims more transparent has been ignored The absence of comprehensive statistics about road traffic accidents means that it is impossible to relate the increasing number of personal injury claims in recent years to the number of accidents Data collection about road accidents needs to be improved help to assist detection of fraudulent personal injury claims and help highways authorities improve road safety by targeting spending on accident black spots The Committee also supports the proposal for an accreditation scheme for medical practitioners who provide medical reports in relation to whiplash claims

Access to justice could also be impaired by Government proposals to switch whiplash claims between 1 000 and 5 000 to the small claims court particularly for people who do not feel confident to represent themselves against insurers who will use legal professionals to contest claims Ways in which use of the small claims track could be combined with the routine submission of expert evidence should be considered Rights, Wrongs, and Injustices Stephen A. Smith, 2019-11-12 Rights Wrongs and Injustices is the first comprehensive account of the scope foundations and structure of remedial law in common law jurisdictions The rules governing the kinds of complaints that common law courts will accept are generally well understood However the rules governing when and how they respond to such complaints are not This book provides that understanding It argues that remedies are judicial rulings and that remedial law is the law governing their availability and content Focusing on rulings that resolve private law disputes for example damages injunctions and restitutionary orders this book explains why remedial law is distinctive how it relates to substantive law and what its foundational principles are The book advances four main arguments First the question of what courts should do when individuals seek their assistance the focus of remedial law is different from the question of how individuals should treat one another in their day to day lives the focus of substantive law Second remedies provide distinctive reasons to perform the actions they command in particular they provide reasons different from those provided by either rules or sanctions Third remedial law has a complex relationship to substantive law Some remedies are responses to rights threats others to wrongs and yet others to injustices Further remedies respond to these events in different ways while many remedies merely replicate substantive duties others modify substantive duties and some create entirely new duties Finally remedial law is underpinned by general principles principles that cut across the traditional distinctions between so called legal and equitable remedies Together these arguments provide an understanding of remedial law that takes the concept of a remedy seriously classifies remedies according to their grounds and content illuminates the relationship between remedies and substantive law and presents remedial law as a body of principles rather than a historical category **HIV/AIDS and Human Rights, International Guidelines** United Nations.
