

Amy Tan's Story "Mother Tongue"

✓ Exclusively available on IvyPanda

A large number of Americans now speak English as a first language but what becomes rare is the fact that it is very difficult to find two people who speak exactly the same English. It is this argument that is made by Amy Tan in her story Mother Tongue.

Amy is a first-generation Asian American who migrated to Oakland from China. She became a famous writer in Oakland and in this story, she narrates her experiences about the English she uses and about how the people around her influenced the way she conversed. At home, she spoke with her mother in broken and uneven English so that she understood in view of her faint knowledge of the language. In speaking with people while she worked or with whom she dealt professionally, she used clear and grammatically correct English.

Amy's mother dreamt of coming to America with her daughter in order to get away from poverty and to provide a better quality of life for her. Amy Tan became a writer and in Mother Tongue, she describes her relationship with her ancestry and traditions. For her English as a language becomes a creative tool and she shares how she was affected by the imperfect English of her mother. The story becomes very consequential and universal since it is not merely about the language itself; it also delves into the relationships with parents and about social and ethnic influences. One is bound to ponder about the consequences of leaving his or her country and then living in a new country. The questions and issues that arise pertaining to maintaining one's identity and ancestral roots.

In writing about the limited knowledge that her mother has of English, Amy Tan is able to show how this lack of knowledge is perceived by others around her and how it impacted her while she was growing. Her audience is primarily her mother who has been reading her writings. But she also addresses a broader audience in terms of the entire generation of Americans who have immigrant parents. This is so because she wants to highlight the several problems faced by such children daily.

She has attempted to make people aware of the struggles faced by emigrants. In being inadequately equipped in regard to the command of the English language, they are not always viewed seriously. They are either ignored or people intentionally pretend

Literacy and Power Hilary Janks, 2009-10-16 Hilary Janks addresses key questions about literacy and power in this landmark text that is both engaging and accessible Her central argument is that competing orientations to critical literacy education domination power access diversity design foreground one over the other but are crucially interdependent

and need to work together to create possibilities for redesign and social action that serve a social justice agenda She examines the theory underpinning each orientation and develops new theory in the argument for interdependence and integration Sitting at the interface between theory and practice constantly moving from one to the other the text is rich with examples of how to use these orientations in real teaching contexts and how to use them to counterbalance one another In the groundbreaking final chapter Janks considers how the rationalist underpinning of critical literacy tends to exclude the non rational shows ways of working beyond reason pleasure and play desire and the unconscious and makes the case that these need to be taken seriously given their power to cut across the work of critical literacy educators working from any orientation
