Motor Trend Suv Of The Year 2012:

Global Tilt Ram Charan, 2013 Shares a playbook for how to run a business in an era when economic growth has stagnated and power has shifted to countries outside America identifying unique opportunities while providing strategies for navigating emerging challenges

Age of Auto Electric Matthew N. Eisler, 2022-12-06 The electric vehicle revival reflects negotiations between public policy which promotes clean fuel efficient vehicles and the auto industry which promotes high performance vehicles Electric cars were once as numerous as internal combustion engine cars before all but vanishing from American roads around World War I Now we are in the midst of an electric vehicle revival and the goal for a sustainable car seems to be within reach In *Age of Auto Electric* Matthew N Eisler shows that the halting development of the electric car in the intervening decades was a consequence of tensions between environmental energy and economic policy imperatives that informed a protracted reappraisal of the automobile system These factors drove the electric vehicle revival argues Eisler hastening automaking's transformation into a science based industry in the process Challenging the common assumption that the electric vehicle revival is due to the development of better batteries *Age of Auto Electric* instead focuses on changing environmental and socioeconomic conditions energy and environmental policies systems of energy conversion and industrial production and innovation practices that affected the prevalence and popularity of electric vehicles in recent decades Eisler describes a world in transition from legacy to alternative energy conversion systems and the promises compromises new problems and unintended consequences that enterprise has entailed

The Truth About Energy John K. White, 2024-02-08 The transition to renewable energy is vital and fast paced but how do we choose which technologies to drive this energy transition This timely book provides everyone interested in the renewable energy transition with an introduction to and technical foundation for understanding modern energy technology It traces everyday power generation through history from the Industrial Revolution to today It examines the use of wood coal oil natural gas hydro and nuclear to produce energy before discussing renewable energy sources such as biomass photovoltaics concentrated solar power wind wave and geothermal The book examines to what extent and how each technology can contribute to a clean green infrastructure *The Truth About Energy* explains the science and engineering of energy to help everyone understand and compare current and future advances in renewable energy providing the context to critically examine the different technologies that are competing in a fast evolving engineering political and economic landscape

Unprecedented David Ray Griffin, 2015-01-04 This book combines 1 the most extensive treatment of the causes and phenomena of climate change in combination with 2 an extensive treatment of social obstacles and challenges fossil fuel funded denialism media failure political failure and moral religious and economic challenges 3 the most extensive treatment of the needed transition from fossil fuel energy to clean energy and 4 the most extensive treatment of mobilization It provides the most complete most up to date treatment of the various kinds of clean energy and how they could combine to provide 70% clean energy by 2035 and 100% before 2050 both
