

Equilibrium Constant - Worksheet 1_ANSWERS

1. Write the equilibrium expression for the following reactions:

$$K = \frac{[U]^u [V]^v}{[W]^w [X]^x}$$

$$K = \frac{[H_2][CO_2]}{[H_2O][CO]}$$

$$K = \frac{[Cl_2][CO]}{[COCl_2]}$$

$$K = \frac{[HCl]^2}{[H_2][Cl_2]}$$

$$K = \frac{[NO][CO_2]}{[NO_2][CO]}$$

$$K = \frac{[Zn^{2+}]}{[Ag^+]^2}$$

*Note: solids are not included

$$K = \frac{[H_2][C_2H_4]}{[C_2H_6]}$$

2. Consider the following equilibrium reaction:

The K_{eq} for this reaction at 25°C is 1.02. At equilibrium the concentration of HBr is 0.50 mol/L. Assuming H_2 and Br_2 are present in equal amounts, calculate the concentration of H_2 at equilibrium.

$$[H_2] = 0.50 \text{ mol/L}$$

Equilibrium Calculations John T. Donoghue, 1971 **Solution Equilibria** F. R. Hartley, Christopher Burgess, R. M. Alcock, 1980 *Chemical Equilibrium* William Guenther, 2012-12-06 The present work is designed to provide a practical introduction to aqueous equilibrium phenomena for both students and research workers in chemistry biochemistry geochemistry and interdisciplinary environmental fields The pedagogical strategy I have adopted makes heavy use of detailed examples of problem solving from real cases arising both in laboratory research and in the study of systems occurring in nature The procedure starts with mathematically complete equations that will provide valid solutions of equilibrium problems instead of the traditional approach through approximate concentrations and idealized infinite dilution assumptions There is repeated emphasis on the use of corrected conditional equilibrium constants and on the checking of numerical results by substitution in complete equations and or against graphs of species distributions Graphical methods of calculation and display are used extensively because of their value in clarifying equilibria and in leading one quickly to valid numerical approximations The coverage of solution equilibrium phenomena is not however exhaustively comprehensive Rather I have chosen to offer fundamental and rigorous examinations of homogeneous step equilibria and their interactions with solubility and redox equilibria Many examples are worked out in detail to demonstrate the use of equilibrium calculations and diagrams in various fields of investigation **Enzyme Kinetics** Robert A. Alberty, 2011-03-10 Rapid

Equilibrium Enzyme Kinetics helps readers emphasize the estimation of kinetic parameters with the minimum number of velocity measurements thereby reducing the amount of laboratory work necessary and allowing more time for the consideration of complicated mechanisms The book systematically progresses through six levels of understanding the enzyme catalyzed reaction and includes a CD ROM so that the reader may use the programs in the book to input their own experimental data *Arrhenius Equation and Non-equilibrium Kinetics* Wolfgang Stiller,1989-01-01 *Chemistry, Kinetics and Thermodynamics* Stanford University. Department of Operations Research. Operations Research House,1970 In the paper the equivalence of three ways of viewing the classical chemical equilibrium problem is discussed From the point of view of classical chemistry this problem can be stated as follows Given the set of reactions that may occur among all the species of a chemical system their equilibrium constants and the initial composition of the system i e the amounts of each species present in the system initially find the equilibrium composition of the system From the point of view of kinetics the problem is to determine the evolution of the various parameters describing the system fothe evolution of the various parameters describing the system from their initial values When the parameters cease to change the system must be in equilibrium Given the same system thermodynamics seeks that composition at which the usable or free energy remaining in the system is at a minimum It can be shown that the system will then be at equilibrium Much of the materiel contained herein is old It is presented here in a consistent notation and in a way intended to emphasize the common aspects of the three points of view Author **Rates of Reaction and Equilibria** Clifford Othen,1972-01-01 **Chemistry 121**
