Shaping the Future of Child and Adolescent Mental Health Matthew Hodes, Petrus J. De Vries, 2022-09-19 Shaping the Future of Child and Adolescent Mental Health Towards Technological Advances and Service Innovations coincides with the 25th International Association for Child and Adolescent Psychiatry and Allied Professions IACAPAP Congress in Dubai from December 5-9, 2022. There are three overarching themes of this book. Firstly, the impact of the Internet and digital technologies on the mental health and well-being of children and adolescents, including computerized therapies and the fundamental role of technologies to advance knowledge in the field. Secondly, a theme on harnessing the expansion of knowledge on psychiatric disorders and their treatment for children and adolescents, exemplified by chapters on different kinds of adversity in child and adolescent mental health and a chapter on precision therapeutics. Given the location of the IACAPAP Congress, the third theme focuses on aspects of child and adolescent mental health in the Eastern Mediterranean Region. Chapters provide insights into a broad range of contemporary technology and service innovation-related topics in child and adolescent psychiatry and mental health. These include growing up in the digital age, cyberbullying, clinical applications of big data and machine learning, computerized cognitive behavioral therapy, technology-enhanced learning, lessons from COVID-19, new understanding of the consequences of psychological trauma, autoimmune encephalitis, and precision therapeutics in depression. Acknowledging the global challenge of child and adolescent psychiatry and mental health, readers will find an emphasis on contextual challenges in the field, including innovations for scaling up of mental health intervention in low and middle-income countries and research and training in the Eastern Mediterranean Region. Emphasizes digital influences and applications in child and adolescent mental health research, psychiatric treatments, and training. Highlights children and adolescents in adversity, including COVID-19 and psychological trauma. Appraises new approaches to understanding selected psychiatric disorders in children and adolescents. Addresses the research in child and adolescent psychiatry and mental health across the Eastern Mediterranean Region and training in the Gulf Region. The Stock Exchange Handbook, 1985

Renal Denervation Richard R. Heuser, Markus Schlaich, Horst Sievert, 2014-11-11 Hypertension remains the leading cause of cardiovascular morbidity and mortality in spite of current medical therapies. It has been estimated that 50% of Western civilization has hypertension and approximately 20% of patients have resistant hypertension. Renal denervation (RDN) is a minimally invasive endovascular catheter-based procedure using radiofrequency ablation aimed at treating resistant hypertension. Early studies show a high degree of effectiveness in renal denervation to treat hypertension. This book examines renal pathophysiology and the rationale for renal denervation as well as possible long-term benefits and risks of this new therapy. The myriad of devices involved in the evolution of this therapy are discussed, and the book concludes with analyses of the cost-effectiveness and future applications. *South African Digest*, 1986
