Encyclopedia of Sustainable Technologies Martin Abraham, 2017-07-04 Encyclopedia of Sustainable Technologies Eight Volume Set provides an authoritative assessment of the sustainable technologies that are currently available or in development Sustainable technology includes the scientific understanding development and application of a wide range of technologies and processes and their environmental implications Systems and lifecycle analyses of energy systems environmental management agriculture manufacturing and digital technologies provide a comprehensive method for understanding the full sustainability of processes In addition the development of clean processes through green chemistry and engineering techniques are also described The book is the first multi volume reference work to employ both Life Cycle Analysis LCA and Triple Bottom Line TBL approaches to assessing the wide range of technologies available and their impact upon the world Both approaches are long established and widely recognized playing a key role in the organizing principles of this valuable work Provides readers with a one stop guide to the most current research in the field Presents a grounding of the fundamentals of the field of sustainable technologies Written by international leaders in the field offering comprehensive coverage of the field and a consistent high quality scientific standard Includes the Life Cycle Analysis and Triple Bottom Line approaches to help users understand and assess sustainable technologies *Microbial Responses to Environmental Changes* Jürg B. Logez, Stuart E. G. Findlay, Jérôme Comte, 2016-01-20 Advances in next generation sequencing technologies omics and bioinformatics are revealing a tremendous and unsuspected diversity of microbes both at a compositional and functional level Moreover the expansion of ecological concepts into microbial ecology has greatly advanced our comprehension of the role microbes play in the functioning of ecosystems across a wide range of biomes Super imposed on this new information about microbes their functions and how they are organized environmental gradients are changing rapidly largely driven by direct and indirect human activities In the context of global change understanding the mechanisms that shape microbial communities is pivotal to predict microbial responses to novel selective forces and their implications at the local as well as global scale One of the main features of microbial communities is their ability to react to changes in the environment Thus many studies have reported changes in the performance and composition of communities along environmental gradients However the mechanisms underlying these responses remain unclear It is assumed that the response of microbes to changes in the environment is mediated by a complex combination of shifts in the physiological properties single cell activities or composition of communities it may occur by means of physiological adjustments of the taxa present in a community or selecting towards more tolerant better adapted phylotypes Knowing whether certain factors trigger one many or all mechanisms would greatly increase confidence in predictions of future microbial composition and processes This Research Topic brings together studies that applied the latest molecular techniques for studying microbial composition and functioning and integrated ecological biogeochemical and or modeling approaches to provide a comprehensive and mechanistic

perspective of the responses of micro organisms to environmental changes This Research Topic presents new findings on environmental parameters influencing microbial communities the type and magnitude of response and differences in the response among microbial groups and which collectively deepen our current understanding and knowledge of the underlying mechanisms of microbial structural and functional responses to environmental changes and gradients in both aquatic and terrestrial ecosystems The body of work has furthermore identified many challenges and questions that yet remain to be addressed and new perspectives to follow up on Official Gazette Philippines,2004
