

Magnum Choke

Hydraulic motor driven manual override

Linear Electric actuator driven (servo)

Magnum chokes offer the customer increased service life and cost savings in high pressure applications, extreme service conditions where the substantial amount of abrasives and debris are present. In extreme services/operations the magnum choke's robust design minimizes the operational downtime and equipment damages.

Product Specification & Features

- The magnum choke body can accommodate 3", 2" or 1.5" orifice with respect to change in process parameters. All sizes of trims are interchangeable within the same choke body.
- Optional manipulator system allows the operator to slide and swing the bonnet assembly for quick tear down for trim changes.
- Designed to provide tight shut off.
- Pressure balanced trim considerably reduces the torque required to operate the choke.
- Large body cavity around trim components reduces the velocity of the solids in the fluids, thus enhances the body life.
- Extended wear sleeve limits downstream erosion to the trim, protecting the body from damage.
- Gate is fully guided by the Bonnet Extension which can be rotated with respect to bonnet to shift the surface wear
- Meets or exceeds the requirement specified by API6A and API 16C.

Applications

Used for extreme applications like flow back, drilling, choke & kill, coil tubing, well control & snubbing.

Available Sizes and Pressure Ratings
