Behavioral Decision Analysis Florian M.

Federspiel,Gilberto Montibeller,Matthias Seifert,2024-05-30 This book lays out a foundation and taxonomy for Behavioral Decision Analysis featuring representative work across various domains Traditional research in the domain of Decision Analysis has focused on the design and application of logically consistent tools to support decision makers during the process of structuring problem complexity modeling uncertainty generating predictions eliciting preferences and ultimately making better decisions Two commonly held assumptions are that the decision maker s cognitive belief system is fully accessible and that this system can be understood and formalized by trained analysts However in past years an active line of research has emerged studying instances in which such assumptions may not hold This book unites this community under the common theme of Behavioral Decision Analysis The taxonomy used in this book categorizes research based on task focus prediction or decision and behavioral level individual or group Two theoretical lenses that lie at the interface between 1 normative and descriptive research and 2 normative and prescriptive research are introduced The book then proceeds to highlight representative works across the two lenses focused on individual and group level decision making Featuring various methodologies and applications the book serves as a reference for researchers students and professionals across different disciplines with a common interest in Behavioral Decision Analysis

Das,2016-11-01 Behavioral strategy continues to attract increasing research interest within the broader field of strategic management Research in behavioral strategy has clear scope for development in tandem with such traditional streams of strategy research that involve economics markets resources and technology The key roles of psychology organizational behavior and behavioral decision making in the theory and practice of strategy have yet to be comprehensively grasped Given that strategic thinking and strategic decision making are importantly concerned with human cognition human decisions and human behavior it makes eminent sense to bring some balance in the strategy field by complementing the extant emphasis on the objective economics based view with substantive attention to the subjective individual oriented perspective This calls for more focused inquiries into the role and nature of the individual strategy actors and their cognitions and behaviors in the strategy research enterprise For the purposes of this book series behavioral strategy would be broadly construed as covering all aspects of the role of the strategy maker in the entire strategy field The scholarship relating to behavioral strategy is widely believed to be dispersed in diverse literatures These existing contributions that relate to behavioral strategy within the overall field of strategy has been known and perhaps valued by most scholars all along but were not adequately appreciated or brought together as a coherent sub field or as a distinct perspective of strategy This book series on Research in Behavioral Strategy will cover the essential progress made thus far in

this admittedly fragmented literature and elaborate upon fruitful streams of scholarship More importantly the book series will focus on providing a robust and comprehensive forum for the growing scholarship in behavioral strategy In particular the volumes in the series will cover new views of interdisciplinary theoretical frameworks and models dealing with all behavioral aspects significant practical problems of strategy formulation implementation and evaluation and emerging areas of inquiry The series will also include comprehensive empirical studies of selected segments of business economic industrial government and non profit activities with potential for wider application of behavioral strategy Through the ongoing release of focused topical titles this book series will seek to disseminate theoretical insights and practical management information that will enable interested professionals to gain a rigorous and comprehensive understanding of the subject of behavioral strategy Decision Making in Behavioral Strategy contains contributions by leading scholars in the field of behavioral strategy research The 10 chapters in this volume cover a number of significant issues relating to the decision making processes practices and perspectives in the field of behavioral strategy covering diverse topics such as failures in acquisitions entrepreneurs under ambiguity metacognition neural correlates of emotion knowledge flows behavioral responses business modeling and alliance capability The chapters include empirical as well as conceptual treatments of the selected topics and collectively present a wide ranging review of the noteworthy research perspectives on decision making in behavioral strategy

Blinding as a Solution to Bias Christopher T Robertson, Aaron S Kesselheim, 2016-01-30 What information should jurors have during court proceedings to render a just decision Should politicians know who is donating money to their campaigns Will scientists draw biased conclusions about drug efficacy when they know more about the patient or study population The potential for bias in decision making by physicians lawyers politicians and scientists has been recognized for hundreds of years and drawn attention from media and scholars seeking to understand the role that conflicts of interests and other psychological processes play However commonly proposed solutions to biased decision making such as transparency disclosing conflicts or exclusion avoiding conflicts do not directly solve the
