Model Uncertainties in Foundation Design Chong Tang, Kok-Kwang Phoon, 2021-03-16 Model Uncertainties in Foundation Design is unique in the compilation of the largest and the most diverse load test databases to date covering many foundation types shallow foundations spudcans driven piles drilled shafts rock sockets and helical piles and a wide range of ground conditions soil to soft rock All databases with names prefixed by NUS are available upon request This book presents a comprehensive evaluation of the model factor mean bias and coefficient of variation COV for ultimate and serviceability limit state based on these databases These statistics can be used directly for AASHTO LRFD calibration Besides load test databases performance databases for other geo structures and their model factor statistics are provided Based on this extensive literature survey a

practical three tier scheme for classifying the model uncertainty of geo structures according to the model factor mean and COV is proposed This empirically grounded scheme can underpin the calibration of resistance factors as a function of the degree of understanding a concept already adopted in the Canadian Highway Bridge Design Code and being considered for the new draft for Eurocode 7 Part 1 EN 1997 1 202x The helical pile research in Chapter 7 was recognised by the 2020 ASCE Norman Medal Flexible Dolphins Crow,2021-09-30 Millions of breasting and mooring dolphins have been installed in inland waterways adjacent to jetties and waiting facilities for ship to ship transshipment or as crash barriers in commercial port areas throughout the world A dolphin is a marine structure that is frequently installed in ports waterways and other places related to marine traffic Dolphins are typically located adjacent to waterfront structures such as quay walls jetties locks and bridge piers The purpose of a dolphin is threefold Allow ships to berth and moor safely and efficiently Protect waterfront structures by acting as a crash barrier and sacrificial structure Direct and guide marine traffic by acting as a lead in dolphin and navigation aid The main objective of this handbook is to provide engineers asset managers suppliers tender teams contractors and principals with such guidance on the design and construction of flexible dolphins by collecting and describing knowledge of and experience with these flexible marine structures This handbook is intended to prevent extensive discussions during the design and construction stages of projects involving flexible dolphins It is part of a series of Dutch port infrastructure design recommendations that include the Quay Walls handbook and Jetties and Wharfs handbook

Geoenvironmental Engineering A.M.O. Mohamed, H.E. Antia, 1998-04-21 The new social and economic era calls for integration of ecology and economy in a system of cause and effect The central element in this shift is sustainable development Fundamental to the achievement of sustainable development is the requirement for environmentally responsible waste management and restoration of the environment Solutions to the complex problems confronted by waste management and environmental restoration industry are currently handled by the geoenvironmental engineering profession that needs a good background in soil biology chemistry mechanics mineralogy and physics In recognition of this need this book summarizes relevant aspects of various soil physics mineralogy and chemistry as well as the chemistry of pollutants This treatment will provide sufficient background to students and practicing engineers to enable them to think about how to approach waste management and environmental restoration problems

Novel Issues on Unsaturated Soil Mechanics and Rock Engineering Laureano R. Hoyos, John S. McCartney, 2018-10-29 This volume discusses issues related to unsaturated soil mechanics and rock engineering based on technical papers focusing on two important topics in geotechnical engineering 1 the characterization of unsaturated soils and 2 the investigation of rock properties The research studies on unsaturated soils include the characterization techniques of the unsaturated soils The studies on rock properties include thermo hydro mechanical behavior of gypsum rock soft rocks capacity role of rock strength in blastability indirect methods to estimate rock strength and variations in isotope distributions in Permian rocks The two broad themes in this collection as summarized above are representative of local challenges facing geotechnical engineers in the Middle East but their contributions can also be extended to other regions of the world The volume is based on the best contributions to the 2nd GeoMEast International Congress and Exhibition on Sustainable Civil Infrastructures Egypt 2018 The official international congress of the Soil Structure Interaction Group in Egypt SSIGE
