What this study was about: This study used mixed methodology to investigate how the use of math journals affected second grade students' communication of mathematical thinking. Data collection included pre/post assessments, students' math journals, and interviews with the students. The teacher also kept a reflection journal. This study looks at the use of math journals as a means of students communicating their mathematical thinking. The research in this study confirms students' ability to communicate their thought processes in math is getting more attention today. Students are required to demonstrate their ability to communicate their mathematical thinking on high stakes testing. Therefore teachers must find a way for students to practice using a variety of methods of communication to explain their mathematical thinking. Another interesting idea about math journals is the fact that they can be used as a means of assessment. While time constraints may become an issue as far as time to write and time to assess. The value of the information the teacher gets from the writing outweigh the time spent grading. The study reported the use of math journals positively influenced students' communication skills of mathematical thinking as well as their use of math vocabulary.

Why this is Relevant to my Study: This study looks at student communication of mathematical thinking and processes. It is relevant to my study because Interactive Student Notebooks will include student written responses to prompts daily. Students will be expected to write their explanations of how they found solutions to problems. Therefore this article will be beneficial to my research because it demonstrates the importance of students being able to communicate, not only orally, but in written form their mathematical thinking. I also found it interesting that in this study the teacher assessed the journals. I will develop a rubric to assess my students' notebooks. I think this type of assessment information can be extremely beneficial to me as a teacher. I plan to keep a reflection journal as well to document benefits I observe through assessing student writing in math journals. I can relate my results to the results of this study.
