Development and Status of Arkansas' Primary Forest Products and Industry Dennis M. May, 1990 *Innovation in the Forest Products Industry* Abra Hovgaard, Eric Hansen, Joseph Roos, 2005 Because there is a lack of innovation research in the forest products industry and innovative activities in the industry are not well documented this study attempted to fill that void The objectives of this study were to understand the process and definition of innovation in the forest products industry identify the constraints on innovative activities identify resources that would improve innovation in forest products companies compare the innovation environments in Alaska and Oregon and provide a benchmark study for innovation in the forest products industry This study revealed that there are several aspects of innovation in the forest products industry In addition the innovation process is a combination of semiformal development stages trial and error intuition and luck A variety of factors constrained companies from being more innovative including government regulations shipping and labor costs lack of cash flow raw material characteristics marketing expertise and raw material supply There do not appear to be any resources that would be helpful to forest products companies at least none that the interviewed companies could recommend Offering companies the chance to exchange ideas and network is the most valuable resource available The innovation environments in Alaska and Oregon are somewhat similar yet different in the marketing tactics employed and the techniques used to obtain market information Furthermore the type of innovation projects that each region focuses on differs as does the actual process used to develop innovations Future research should focus on completing a quantitative component to this study developing short courses or 1 day seminars identifying factors that contribute to innovation success and failure investigating why the forest products industry is not innovative by nature and exploring the external acquisition of innovation in the forest products industry **Basic Information Sources on Lumber and Wood Products Industries**, 1956

*Forest Products Journal*, 1978 Beginning in 1952 an unnumbered Dec issue is published consisting of the society's Proceedings and the annual index of the Journal **Instant Insights: Developing forestry products** Dr David Nicholls, Prof. J. W. 'Jerry' Van Sambeek, Prof Jegatheswaran Ratnasingam, Dr Tatjana Stevanovic, Dr Michael A. Gold, 2021-06-15 This collection features five peer reviewed literature reviews on developing forestry products The first chapter discusses trade offs between timber products from plantation forests and the need to protect ecosystem services such as carbon sequestration It reviews ways of innovating business practices the use of solid wood reconstituted products and woody biomass as products The second chapter explores hardwood tree management within agroforestry systems for the production of veneer and high quality sawlogs It reviews how to optimise production in alley cropping riparian buffers and silvopasture systems The third chapter assesses the range of non timber forest products from tropical forests These include non wood fiber resources including bamboo rattan and agricultural biomass These can be used to replace traditional wood fibers in both building and non structural applications The fourth chapter focusses on new processes and applications of

forestry products It discusses cellulose pulp conversion into cellulosic nanomaterials hydrolysis of hemicelluloses from wood to produce sugars for use in the food industry as well as extraction of polyphenols from bark for nutraceuticals The final chapter reviews alley cropping practices to produce overstory nut crops It discusses genetic improvement of nut trees orchard design and management as well as pest management in nut tree alley cropping *The Process of Productivity Change in the Forest Products Industry* H. M. Gregersen, 1983 *Nontimber Forest Products in the United States* Eric T. Jones, Rebecca Jean McLain, James F. Weigand, 2002 A quiet revolution is taking place in America's forests Once seen primarily as stands of timber our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized Now as timber harvesting becomes more mechanized and requires less labor the image of the lumberjack is being replaced by that of the forager This book provides the first comprehensive examination of nontimber forest products NTFPs in the United States illustrating their diverse importance describing the people who harvest them and outlining the steps that are being taken to ensure access to them As the first extensive national overview of NTFP policy and management specific to the United States it brings together research from numerous disciplines and analytical perspectives such as economics mycology history ecology law entomology forestry geography and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products an overview of uses and users and discussions of sustainable management issues associated with ecology cultural traditions forest policy and commerce They examine some of the major social economic and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape from the Pacific Northwest to the Caribbean From honey production to a review of nontimber forest economies still active in the United States such as the Ojibway harvest of plants recounted here the book takes in the whole breadth of recent NTFP issues including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands No other volume offers such a comprehensive overview of NTFPs in North America By examining all aspects of these products it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests
