board the scientific committee the theme patrons the publisher and printer the advisors of whatever kind and here we have to make an exception there is Ingo and Amanda Nobody who has been part of the production of this book could have done without them at the very least as they handled issues you wouldn't even believe could turn up with efficiency and charm Thanks Ingo Valtingoier thanks Amanda Staley In the accumulation of the contributions and the preparation of the proceedings we encountered one development that we were very happy about the sports engineering community keeps growing in the number of researchers and experts involved but also in the breadth of disciplines and institutions contributing This should definitely be interpreted as a positive development even though in the evaluation of contributions this leads to a number of intricate discussions

Structural Integrity and Fatigue Failure Analysis Grzegorz Lesiuk, Mieczysław Szata, Wojciech Blazejewski, Abílio M.P. de Jesus, José A.F.O. Correia, 2022-05-04 This book contains full papers presented at the First Virtual Conference on Mechanical Fatigue VCMF 2020 which was organised by the University of Porto FEUP Portugal the Wrocław University of Science and Technology Poland University of Electronic Science and Technology of China China Siberian Federal University Russia and the ESIS TC12 Technical Committee European Structural Integrity Society ESIS between 9 and 11 of September 2020 This conference was intended to be a forum of discussion of new research concepts equipment technology materials and structures and other scientific advances within the field of mechanical fatigue and fracture The first edition of the VCMF 2020 event has reached more than 60 participants from more than 20 nationalities demonstrating the vitality of this new event

Motorcycle Accident Reconstruction Nathan Rose, 2022-01-07 Accident reconstruction utilizes principles of physics and empirical data to analyze the physical electronic video audio and testimonial evidence from a crash to determine how and why the crash occurred how the crash could have been avoided or to determine whose description of the crash is most accurate This process draws together aspects of mathematics physics engineering materials science human factors and psychology and combines analytical models with empirical test data Different types of crashes produce different types of evidence and call for different analysis methods Still the basic philosophical approach of the reconstructionist is the same from crash type to crash type as are the physical principles that are brought to bear on the analysis This book covers a basic approach to accident reconstruction including the underlying physical principles that are used then details how this approach and the principles are applied when reconstructing motorcycle crashes This second edition of *Motorcycle Accident Reconstruction* presents a thorough systematic and scientific overview of the available methods for reconstructing motorcycle crashes This new edition contains Additional theoretical models examples case studies and test data An updated bibliography incorporating the newest studies in the field Expanded coverage of the braking capabilities of motorcyclists Updated refined and expanded discussion of the decelerations of motorcycles sliding on the ground A thoroughly rewritten and expanded discussion of motorcycle impacts with passenger vehicles Updated coefficients of restitution for collisions between motorcycles and cars A new and expanded discussion of using passenger car EDR data in

motorcycle accident reconstruction A new section covering recently published research on post collision frozen speedometer readings on motorcycles A new section on motorcycle interactions with potholes roadway deterioration and debris and expanded coverage of motorcycle falls This second edition of Motorcycle Accident Reconstruction is a must have title for accident reconstructionists forensic engineers and all interested in understanding why and how motorcycle crashes occur
