Simón Sánchez Fernández, 2020-12-10 Durante la edad escolar el alumnado está en continuo cambio y el profesorado necesita de herramientas que se adapten a esos cambios y sobre todo al alumnado actual Debido al nuevo enfoque en el paradigma de enseñanza aprendizaje centrando el proceso en el discente este libro pretende dar al profesorado de Educación Física herramientas para involucrar y fomentar la participación del alumnado y así modificar el centro de atención para ponerlo más en el aprendizaje que en la transmisión de contenidos dejando como eje central del proceso al propio alumnado Estas herramientas están basadas en las metodologías activas que pretenden desarrollar aprendizajes significativos para que el proceso se produzca de una manera activa Esto según la literatura científica actual nos garantiza resultados mejores y más duraderos Se podría pensar que metodologías activas son sinónimo de innovación actual pero no es así las metodologías activas ya existían en la Grecia clásica con el método socrático En este trabajo pretendemos mostrar distintas de estas metodologías y cómo aplicarlas en el entorno escolar desde la perspectiva práctica de la educación física Muchas de ellas son válidas para la educación actual en tiempos de COVID donde

estamos habituados a términos como semipresencialidad bimodalidad docencia sincrónica o asincrónica los cuales están marcando el aprendizaje en nuestras aulas También hemos querido dar importancia a la inclusión educativa a través de la EF mediante la utilización de metodologías activas hemos dedicado para ello un capítulo con profesionales con más de 20 años de experiencia La relevancia de este capítulo proviene de nuestra experiencia como docentes de grado y posgrado donde llevamos a los detectados carencias en el alumnado con respecto a temas de inclusión ya que consideramos que todo docente debería estar mejor formado en este aspecto *Laboratorio de física* José L.
