Kangas Nightly Business Report:

Mind, Money & Markets Dave Harder, Janice Dorn M.D. Ph.D., 2014-10-10 After losing much of his money when the South Sea Bubble burst in 1720 English physicist and mathematician Isaac Newton stated I can calculate the motion of heavenly bodies but not the madness of people Even though Isaac Newton was a brilliant man he did not realize that markets function in a way that is opposite to almost everything else we do For example if people are lining up around the block to purchase an iPad it is a sign that it is a good product If people are lining up around the block to buy a condominium it is a bad sign for real estate Markets do not always act in a rational or logical manner Mind Money Markets explains why they act the way they do It is critical for every person to understand this in order to make wise decisions ranging from buying a home to operating a business Expert advice is much less reliable than we expect it to be because no one can accurately predict the future on a consistent basis Gigantic losses like the 6 2 billion trading loss at JP Morgan in 2012 show that investors are not giving momentum following the trend the respect it deserves Mind Money Markets offers a momentum filter specifically a screening tool from which every individual and professional investor should benefit The book also provides a circuit breaker that enables investors to limit losses in case of an unexpected event in financial markets Using powerful and poignant analogies from their life experiences including Dave Harder s twelve years as a Search and Rescue volunteer we provide readers with a simple discipline to preserve precious hard earned capital during severe downturns and to outperform benchmarks when markets are in an uptrend It is easier to know what to do than to actually do it Psychiatrist Dr Janice Dorn specializes in helping traders and investors deal with emotions and aspects of human nature that hinder them from making astute investment decisions for stocks bonds real estate currencies or commodities We have passed on many words of wisdom collected from market sages and great thinkers We also highlight some major misconceptions about investing and show the reader how to overcome them and prosper With a compelling mixture of fascinating stories and more than 100 colored charts and photographs this is truly a unique work about how human beings react to markets The book helps individual as well as professional investors to be efficient with their time and energy by teaching them to focus only on a few factors which have the most significant impact on financial markets The personalized strategies provided in these pages will enable readers to maximize gains minimize losses and have more time to spend on things that matter the most in their lives

Bulletproof Brett M. Ward,2007-03 Non Fiction Fantasy Why do humans use less than one one millionth of their total mental potential Is there anything stopping us from using the rest And if not how do we use the rest but most curiously why

do we have so much and use so little And if our body s cells are constantly being replaced why do we grow old and die a contradiction of that restoration process The answers to these questions are what this book is about Obsessed with finding the answers a research scientist spent his entire life digging until he unexpectedly found himself looking into history including even the Bible for clues He then had to subject that book itself the Bible to the scientific method of analysis to either validate it or invalidate it as a creditable source This is not a faith based work but includes a clinical scientific analysis to separate the nebulous world of religious views from palpable truth and reality with a complete disregard for political correctness The discoveries made here are so utterly amazing that the way it has to be told is in an autobiographical story form following the step by step developments of the discovery process This is a true story and this brief statement vastly understates the issues at hand

TOWERS IN THE SAND Donn R. Colee Jr.,2016-08-30 Broadcasting touches almost every person in the United States every day But like the air we breathe we seldom give it a second thought Towers in the Sand is the only comprehensive history of Florida s broadcasting industry 1922 2016 the people who brought the stations to life and the events that saw the state grow from boom to bust and back again to now the nation s third most populous Over a decade in the making and fully referenced and indexed Towers in the Sand tells stories from over eighty Florida broadcasting pioneers and current leaders from the Keys to the Panhandle A celebration of broadcasting s proudest moments through hard hitting journalism and editorials lifesaving moments through decades of hurricanes and lighthearted moments with favorite personalities and promotions Towers in the Sand also laments the loss of a national treasure as most stations were transformed from local community partners to lines on corporate balance sheets As broadcasting sits at the precipice of a very uncertain future the author hopes through this work to engage thought conversation and action to ensure its continued relevance in society
