Cassorla, 2018-03-15 This book is recommended to psychoanalysts and therapists interested in the analytical technique and particularly that work with patients who have deficits in their symbolization capacity It presents studies of technical aspects of the analytical process with patients who are difficult to reach Collusions named chronic enactments show that the analytic dyad cannot dream and the analytical field is paralyzed without the analyst perceiving it Chronic enactments are undone through unconscious acts or behaviours that threaten to destroy the analytical process behaviours that are named acute enactments The thorough study of these enactments show that they take the dyad to an awareness of the discrimination between self and object and re establish the capacity to dream It is demonstrated that this occurs in an attenuated traumatic form revealing in the analytical field the externalization of primitive non dreamed traumas Clinical artistic and mythical models are part of the discussion The emphasis on clinical aspects allows readers to use different theories to consider the clinical facts The clinical theories used by the author are mostly post Kleinian and Bionian
