American children are the most tested in the world and the poor and the less competent are the most tested of all We keep trying to improve literacy learning by developing new tests with better technical characteristics But as we shall see all of this testing has had if anything the opposite effect Our error has been in approaching the matter as if it were merely a technical problem as if it were possible even desirable to exclude human judgment and values from the assessment process and as if it were reasonable to treat children as psychological objects Assessment is a profoundly human social phenomenon thoroughly value laden and it cannot be otherwise And in order to draw valid conclusions about a child s learning a teacher must understand how learning takes place The very complexity of this is in knowing the available assessment options and understanding their consequences In *Knowing Literacy* Peter Johnston sets forth the theoretical basis for today s assessment

practices in the context of contemporary literacy learning theory This comprehensive text will equip teachers with the knowledge and techniques to assess in ways that help their students develop a more thoughtful literacy Part One describes the social and educational basis of literacy assessment and develops an understanding of the knowledge required for accurate assessment including the connections between a teacher s assessment practices and students self assessments Part Two explores the personal social and intellectual nature of literacy and its development what characteristics to notice and document and what they mean Part Three illustrates methods of documenting that development in ways that will contribute to the growth of a democratic literacy These chapters offer examples of checklists report cards portfolios and observation forms and discuss their possibilities and implications Two chapters co authored with Marie Clay are accompanied by a CD of children reading These chapters and the tape show you step by step how to make and interpret running records of children s oral reading Part Four is intended to change the ways we talk about children s literacy development It provides ways to engage various members of the school community in productive conversations about literate teaching and learning The final chapter helps us understand how to keep track of literate development without losing our way and forgetting the point of literacy learning
