Perspectives on Waste from the Social Sciences and Humanities Richard Ek,2020-03-26 Waste is something we encounter on an everyday basis Today the waste mountain is increasing despite ambitious measures being taken to decrease it Consequently increased scholarly interest is being devoted to waste but primarily from a technocratic and scientific point of view This compilation offers different perspectives on waste its characteristics and its presence in the world from social scientist and humanist standpoints Waste is the constant companion to the human and is thus inherent in modern society Therefore waste needs to be further approached and understood from a plethora of scholarly perspectives and disciplines and further investigated through a multitude of methodologies and data collection techniques The imagination of a future where waste preventive actions and circular economies permeate society can only be a reality if technocratic and scientific accounts of what is to be done when and how are complemented by social scientific and humanist concepts of the nature and constitution of waste Such a perspective offers the possibility to understand how waste is constituted through relationships language materials politics practices and structures This book shows that philosophers historians cultural theorists and economists have much to offer on the topic of waste as a part of everyday modern life
