Special Interest Terry M. Moe, 2011-04-01 Why are America's public schools falling so short of the mark in educating the nation's children Why are they organized in ineffective ways that fly in the face of common sense to the point that it is

virtually impossible to get even the worst teachers out of the classroom And why after more than a quarter century of costly education reform have the schools proven so resistant to change and so difficult to improve In this path breaking book Terry M Moe demonstrates that the answers to these questions have a great deal to do with teachers unions which are by far the most powerful forces in American education and use their power to promote their own special interests at the expense of what is best for kids Despite their importance the teachers unions have barely been studied Special Interest fills that gap with an extraordinary analysis that is at once brilliant and kaleidoscopic shedding new light on their historical rise to power the organizational foundations of that power the ways it is exercised in collective bargaining and politics and its vast consequences for American education The bottom line is simple but devastating as long as the teachers unions remain powerful the nation s schools will never be organized to provide kids with the most effective education possible Moe sees light at the end of the tunnel however due to two major transformations One is political the other technological and the combination is destined to weaken the unions considerably in the coming years loosening their special interest grip and opening up a new era in which America s schools can finally be organized in the best interests of children *Human*

Determinants of an audit report lag. A meta-analysis Philipp Wierchowski, 2021-10-06 Seminar paper from the year 2020 in the subject Business economics Information Management grade 2.0 University of Bremen language English abstract This paper shows with the help of a meta analysis the existence of the determinants of an audit report lag Moreover this article calculates the relevance of these determinants with the help of Z scores The justification of this paper is to get a greater extent of knowledge through a meta analytic literature review of the determinants of audit report lags An audit report lag is the number of days from a company's fiscal year end to the date of its auditor's report Due to the great development of the globalization and economy this world

has more economical data and is more complicated in an economical context than before Proof for this statement is the subprime crisis 2007 where Asset Backed Commercial Papers had a complicated transformation In addition to this the accounting has issues with too much information and complicated financial products At first accounting has problems with disclosure of information in the financial statement Secondly Big Data challenges accounting and finally audit report lags are larger after a new standard is set by the standard setter or a company has a poor performance in this particular fiscal year In addition to this last problem there are a lot of more determinants for an audit report lag than these two Accordingly this audit report lag is a problem for accounting
