 is Our Food Consumed Today Food safety has become a hot topic and an important public issue due to the increasingly
 widespread nature of foodborne illnesses in both developed and developing countries As food is biological in nature and
 supplies consumers with nutrients it is also equally capable of supporting the growth of microorganisms from the
 environmental sources A precise method of monitoring and detecting of foodborne pathogens including Salmonella sp Vibrio

 Clinical treatments of infection caused by foodborne pathogens are becoming tougher with the increase number of multidrug
 resistant pathogens in the environment This situation creates a huge healthcare burden e g prolonged treatment for
 infections decrease in the efficacy of antibiotic delay in treatment due to unavailability of new antibiotics and increased
