*Scheduling Challenges Within Maintenance Repair and Overhaul Operations in the Civil Aviation Sector* Salah Albakkoush, Emanuele Pagone, Konstantinos Salonitis, 2020 Aircraft Maintenance Repair and Overhaul MRO corporations provide two types of service light and heavy maintenance Typical MRO problems are related to scheduled and unscheduled aircraft maintenance because of the large number of components and parts that need a lead in time for delivery and the consequent scheduling of work This paper focuses on the significant causes of such problems affecting MRO operations It addresses three major factors as follows OEMs Maintenance schedule and manpower and turnaround time By a systematic review and analysis of scientific literature sources it is shown that aviation industry standards do not permit aircraft to be scheduled unless they are maintained according to and comply with the stringent standards related to airworthiness What seems to be important is effective maintenance schedule planning since this reduces time and cost and enables aircraft to be maintained in a short time Unfortunately light maintenance remains beyond the control of airlines because no time allowance is programmed into flight schedules for such events vs increase the number of flight schedule per day

**Pervasive Computing** Patrik Floréen, Antonio Krüger, Mirjana Spasojevic, 2010-05-06 th Welcome to the proceedings of the 8 International Conference on Pervasive Computing Pervasive 2010 After Toronto Sydney and Nara the conference has now returned to Europe Pervasive is one of the most important conferences in the area of pervasive and ubiquitous computing As in the previous year we had two categories of technical papers Full Papers and Notes Pervasive attracted 157 valid submissions from which the Technical Program Committee TPC accepted 24 full papers and one note resulting in an overall acceptance rate of 16% The submissions included 628 authors from 27 countries representing all the continents except Antarctica As we can see from these figures Pervasive is a truly global highly competitive conference A major conference such as Pervasive requires a rigorous and objective process for selecting papers This starts with the selection of a high quality TPC We were fortunate to be able to draw on the wisdom and experience of

our 28 TPC members from the most prestigious universities and research labs in rope North America and Asia This committee was aided by the input of no less than 238 external reviewers chosen on the basis of their domain knowledge and relevance to pervasive computing The papers were selected using a double blind review with four peer reviews perpaper adiscussionphaseamongthereviewers andadiscussionofthepapers in the TPC meeting which was held in Palo Alto during December 12 13 2009 We thank Nokia Research Center for hosting the meeting
