Mouse Reaktion Books Animal:

Speaking for Animals Margo DeMello, 2013 This text contributes to the growing field of human animal studies by examining the human impulse evidenced in blogs social networking sites video games comic books and animal welfare literature to ventriloquize the animal voice *Animal Ethics for Veterinarians* Andrew Linzey, Clair Linzey, 2017-08-15 Veterinarians serve on the front lines working to prevent animal suffering and abuse For centuries their compassion and expertise have improved the quality of life and death for animals in their care However modern interest in animal rights has led more and more people to ask questions about the ethical considerations that lie behind common veterinary practices This Common Threads volume drawn from articles originally published in the Journal of Animal Ethics JAE offers veterinarians and other interested readers a primer on key issues in the field Essays in the first section discuss aspects of veterinary oaths how advances in animal cognition science factor into current ethical debates and the rise of complementary and alternative veterinary medicine and its relationship to traditional veterinary medicine The second section continues with an essay that addresses why veterinarians have an obligation to educate animal caregivers to look past cuteness in order to treat all animals with dignity The collection closes with three short sections focusing on animals in farming trade and research areas where veterinarians encounter conflicts between their job and their duty to advocate and care for animals Contributors Judith Benz Schwarzburg Vanessa Carli Bones Grace Clement Simon Coghlan Priscilla N Cohn Mark J Estren Elisa Galgut Eleonora Gullone Matthew C Halteman Andrew Knight Drew Leder Andrew Linzey Clair Linzey Kay Peggs Megan Schommer Clifford Warwick and James W Yeates The Ethical Case against Animal Experiments Andrew Linzey, Clair Linzey, 2017-12-21 At present human beings worldwide are using an estimated 115 3 million animals in experiments a normalization of the unthinkable on an immense scale In terms of harm pain suffering and death animal experiments constitute one of the major moral issues of our time Given today's deeper understanding of animal sentience the contributors to this volume argue that we must afford animals a special moral consideration that precludes their use in experiments The Ethical Case against Animal Experiments begins with the Oxford Centre for Animal Ethics's groundbreaking and comprehensive ethical critique of the practice of animal experiments A second section offers original writings that engage with and elaborate on aspects of the Oxford Centre report The essayists explore historical philosophical and personal perspectives that range from animal experiments in classical times to the place of necessity in animal research to one researcher's painful journey from researcher to opponent A devastating look at a contemporary moral crisis The Ethical Case against Animal Experiments melds logic and compassion to mount a powerful challenge to human cruelty Picturing Animals in Britain, 1750-1850 Diana Donald, 2007-01-01 From fine art paintings by such artists as Stubbs and Landseer to zoological illustrations and popular prints a vast array of animal images was created in Britain during the century from 1750 to 1850 This highly original book investigates the rich meanings of these visual representations as well as the ways in which

animals were actually used and abused What Diana Donald discovers in this fascinating study is a deep and unresolved ambivalence that lies at the heart of human attitudes toward animals The author brings to light dichotomies in human thinking about animals throughout this key period awestruck with the beauty and spirit of wild animals people nevertheless desired to capture and tame them the belief that other species are inferior was firmly held yet at the same time animals in stories and fables were given human attributes though laws against animal cruelty were introduced the overworking of horses and the allure of sport hunting persisted Animals are central in cultural history Donald concludes and compelling questions about them then and now remain unanswered **Gone Feral** Casey Jean O'Reilly-Conlin,Andrea

O'Reilly,2025-03-01 **Gone Feral** Unruly Women and the Undoing of Normative Femininity is an edited collection that probes the concept of ferality as it relates to and intersects with traditional patriarchal dictates of normative femininity The collection appropriately is a creative hodge podge of feral representations and enactments that span multiple disciplines and social and existential dimensions and utilizes textual and intertextual analysis creative non fiction feminist theory critical animal studies literature media analysis poetry and artwork to explore the complex and contradictory nature of ferality as it exists within outside and on the margins of patriarchal culture Ultimately the collection seeks to understand and showcase how the concept of ferality may be understood as an inevitable consequence of and potential resistance to patriarchal culture and the dictates of normative femininity that have long snared feminine potential caged feminine spirits and neutered feminine authenticity **Animal Breeding, Welfare and Society** Jacky Turner,2010-08-12 The determination of when how often and with whom an animal breeds is moving rapidly away from evolutionary pressures and towards human purposes these include the breeding of around 50 billion mammals and birds for food production annually the breeding of pedigree dogs and cats racing dogs and horses specialised laboratory animal strains and the use of reproductive science to conserve endangered species or breeds and to limit unwanted populations of pests and non native species But the ethics and sustainability of this takeover of animals reproductive lives have been insufficiently examined by either professionals or the public This book discusses the methods the motivations and the consequences of human intervention in animal breeding in terms of animal health behaviour and well being It explores where we are now and the choices ahead and looks to a future where we have more respect for animals as sentient beings and where we could loosen the reins of reproductive control
